## **1.0 PRODUCT DESCRIPTION**

### **1.1 INTRODUCTION**

Is a rechargeable battery operated with drug, saline, and auto-pulled syringe compartments to automatically calculate and withdraw medication as ordered by doctor.

### **1.2 Background**

One of the error that may happen in the medical field is during dilution of medication. There are many different types of medication which are highly concentrated and also cytotoxic needs to be diluted .The process of dilution require manual technique using the conventional syringe. Therefore, the technology used for the drug dilutor machine which are HiBaSed from B. Braun Space Perfusor and Infusomat pumps will ensure accurate dilution of medication ,r educe time and spillage in preparing medication. Besides that, drug name up to 24 characters is available in this programme.

### **1.3 PURPOSE OF DEVELOPMENT**

- Prevent errors during dilution process
- Prevent medication errors
- Minimize workload
- Reduce injury or needle prick among nurses
- Prevent drug spillage
- Time saving

### **1.4 PRODUCT CONCEPT**

- For assisting medical staffs especially in preparing medication and avoid medication errors

#### **1.4.1 APPLICATION**

Basically in hospital setting which requires medication dilution especially in the ward or pharmacy

#### **1.4.2 FUNCTIONS**

- Auto pulled syringe's compartment – able to fix 10cc, 20cc and 50cc syringe and automatically withdraw drug's solution
- Compartment of saline and drug- able to place and dilute drug and saline
- LED touch screen with soft keys– able to visualize amount/volume of solution and to set calculation for drug dilution
- Accessories :
  - Battery
  - Plug and cable
  - Smart infusion tubing

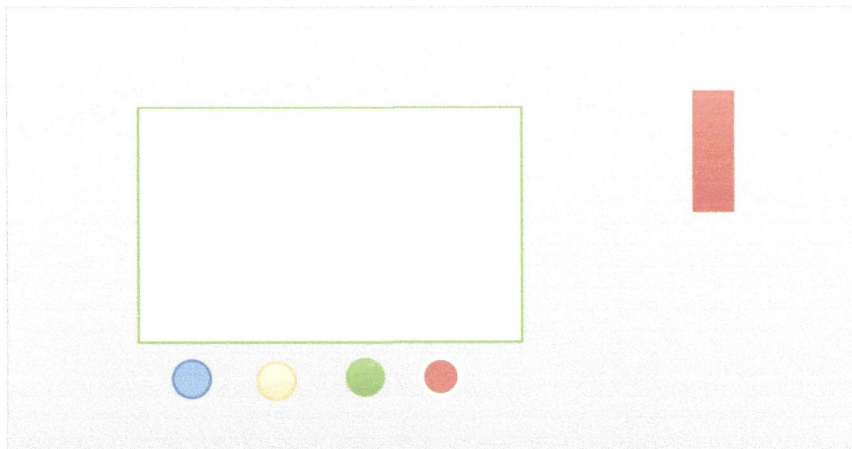

## 1.5 UNIQUE FEATURES

The uniqueness of the product for availability for the product in Malaysia market consist of :

- LED touch screen to set calculation of amount and volume for drug dilution
- Smart compartment for placement and dilution of saline and drug with smart infusion tubing
- Auto-pulled syringe's compartment to automatically withdraw dilute medication
