Stick On Tracer (SOT)

CHAPTER 1

PRODUCT DESCRIPTION

1.0 INTRODUCTION

- The innovation product is a tracer named as “Stick On Tracer” (SOT).
- The main function of our product is to track things or people that are lost, misplaced, or forgotten.
- SOT can be used by anybody in any kind of situation to find your belongings or beloved.
- This SOT product comes into three components which are the main electronic sticker device, a chip, and a tracking application.

1.1 Purpose Of Development

- To enable people to keep in touch with their items or belongings.

1.2 Product Concept

- The product is designed for people to locate precious things / items / people easily as well as to reduce time taken searching for them.

1.3 Applications

- Technology comes with GPS locator and alarm system.
- SOT provided with application that connect to device like phone and tablet.

1.4 Functions

- GPS – for tracking and locating things/people attached with the SOT.
- Alarm system – gives sound or alertness so that the item can be found easily.
- Tracking application – GPS connected to application in android device for visualizing location and controlling the system.

Stick On Tracer (SOT)

1.5 Unique Features

- SOT is covered with nanowires electronic material which gives water resistance properties and attachable on any type of surfaces.
- No internet is required to access GPS location via the tracking application in which it enables SOT users to utilize it anywhere even in remote areas by applying the chip technology.
