**HAZIM BIN MUHAMMAD
2000611106**

SUPERVISED BY:

MR. ZAKARIA BIN HUSSAIN

Abstract

Final project is a part of course structure for student in their final year. The project is compulsory to us as a final year student for Diploma in Electrical Engineering. The purpose of doing this project is to produce student main power with a very skill and able to handle a responsibility that been given like this project. We should prepare to deliver a creativity idea and good interpersonal image to our future employee.

By doing this project it will make student used all their knowledge, capability, creativity and skills to purpose create and trouble shoot the project. It is because all of the theory and skills that they have learned from the project will be used in the future.

In our project, before technology was founded, human sense something using eyes and ears. This multipurpose of radar is new technology of sense something that moving by the transducer that will detect and a pulse will be produced. It depend a sensitivity setting and the direction of the movement.

ACKNOWLEDGEMENT

BISMILLAHIRRAHMANIRRAHIM

Alhamdulillah Robbil A'lamin, Salawat and Salam to the greatest Prophet, Muhammad s.a.w and to all his generations and also to his good companions.

Thank very much and a big has to thank to Allah Taala the god, and the Almighty (AR-Rahman and AR-Rahim) my friend and I can finish this project 2 for subject KEU 380

Firstly we want to thank to our supervisor, **Mr. Zakaria Bin Haji Hussain** because of his co-operation in teaching and advise us how to complete this project 2, Multipurpose of Radar. We appreciate his kindness and co-operation.

We would like to thank him because he also helping us with his expertise throughout this projects 2. His help was essential in completing this text. We also appreciate him in helping my friend and I in circuit maker class especially in project simulation.

My friend and I would also like to thank to our Project 2 co-coordinator, **Mrs. Tuan Syahirah Bt. Tuan Yaacob** because of her experience to manage all project 2 in part 6 without pushing the students

My friends and I would also like to thank to **University Teknologi Mara staff** especially from computer lab and library because of their help to us to make the circuit maker and find the reference of project 2 last semester and electronics book.

Finally, we would like to thank to **all fellow students and lecturers** that contributes to the appearance of this text, it is always a pleasure working with them especially with their good commitments and professionalism at each stage of text production.

Again, thankful to **ALLAH S.W.T**, God bless you all and thank you very much to all.
Wassalam..

OBJECTIVES

This final report made for project 2, KEU 380. Every plan or work needs its aim why the plan or work must be done. Therefore, the main **objectives of this project 2, KEU 380 are:**

- 1) To complete the requirement of course subject KEU 380 in part 6.
- 2) To teach all engineering students more details about parts and components those are use in this project 2 especially the integrated circuit (ics).
- 3) To make all electrical engineering students learn and understand about project simulation in circuit maker
- 4) To prepare the students for the final project this is project 2, KEU 380 that every engineering student must deal in last semester of diploma

Otherwise, after have done this project 2, KEU 380, every electrical engineering students should be able to:

- 1) Plan a good project
- 2) Fully manage how to make a project with confident
- 3) Analysis the project/problem
- 4) Suggest a suitable solution
- 5) Discuss in group
- 6) Write a final report
- 7) Present the project

Besides that, the **objective of MULTIPURPOSE OF RADAR is:**

- 1) To detect a motion movement
- 2) To detect intruder and so on as a security alarm to shop or homes
- 3) As welcoming alarm for visitor at shop or homes
- 4) To understanding the operation of this project
