CHAPTER 1

1.0 PRODUCT DESCRIPTION

1.1 Introduction

The product to be developed is a “Pocketguide CT Protocol”. Pocketguide CT Protocol provides a dynamic and interactive method of viewing and studying of protocol, registration, fusion, modalities, anatomical parts and localization especially for CT-Imaging.

1.2 Purpose of development

The purpose of the product development are:

- To help user to have access to the CT Protocol and learning how to produced a good CT Scan. The apps program is not intended to replace full workstations and should be used only when there is no access to a workstation and knowledge for beginner and how to fulfilled a such CT examination at the new department.

1.3 Product Concept

- Mobile apps with interactive display.

1.4 Application

1.4.1 Functions

- Pocketguide CT Protocol mobile apps is used for vewing and studying of protocol, registration, fusion, modalities, anatomical parts and localization especially for CT-Imaging.
- The following protocols are included:
 - I. CT brain
 - II. CT abdomen
 - III. CT thorax
 - IV. CT Pelvic
