AUTHOR'S DECLARATION

I declare that the work in this final year project paper was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the results of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any degree or qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for Undergraduate, Universiti Teknologi MARA, regulating the conduct of my study and research.

Name of Student : Muhammad Syafiq Amini Bin Azeman

Student I.D. No. : 2016718499

Programme : Bachelor of Business and Administration (Hons)
Investment Management.

Faculty : Business and Management

Thesis : CAN SLIM method for evaluating stock market in
Malaysia

Signature of Student : 

Date : December 2018

ABSTRACT

This study aims to examine empirically the impact of CAN SLIM method toward stock market price in Malaysia. Ten companies under technology sector had being selected in order to carry out this research. This study using panel data over the quarterly period on 2017. For empirical analysis, after checking the data for stationarity the least square method has been used. The empirical analysis result shows that not all the variables have a positive impact on the dependent variable. The variables that have a significant impact on stock market price are annual earning, new product and leader or laggard. Thus, the other variables such as current eps, supply and demand, institutional sponsorship and market direction does not have a significant impact toward stock price. The findings suggest that extending the observation data of the study will shows the preferable result. As the period of the observation will be extended, it will show the trend and performance of the stock market and how much tendency of other market influence the dependent variables.

ACKNOWLEDGEMENT

Alhamdulillah, all praises to Allah for the strengths and His blessing upon completing this project report. This project report was prepared for subject Industrial Training Project Paper. I would like to give my special thanks to my lecturer Mr. Syamsul Bin Samsudin for his supervision, support and his invaluable help of constructive comments and suggestions throughout the project works have contributed to the success of this project. I want to take this opportunity to express our gratitude to the people who have been instrumental in the successful completion of this project. The cooperation and support received from my coordinator Dr. Roslina Binti Shafi for supporting for this project. It is a blessed to have her constant support and help. Without her cooperation and guidance, this project would not have been happened. Finally, I would like to give my gratitude thanks to my parents and people who helped me either directly or indirectly for their cooperation. Thanks to all my friends and everyone, that has been by supporting my work and help during the report project progress till it is fully completed. Thank you.
