## **AUTHOR'S DECLARATION**

I declare that the work in this thesis was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the results of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any degree qualification.

I hereby, acknowledge that have been supplied with the Academic Rules and Regulations for post Graduate, Universiti Teknologi MARA, regulating the conduct of my study and research.

Name of Student	: Mohd Khairul Anuar Bin Ab Rahim Yang
Student ID. No	: 2017679498
Programme	: Master of Occupational Therapy (Developmental Disability)
Faculty	: Health Sciences
Thesis Title	: “Outcomes of OT’s Hip Abduction Brace on Children with Developmental Dysplasia of Hip (DDH)”
Student Signature	: .....  .....
Date	: January 2019

## **ABSTRACT**

Developmental Dysplasia of Hip (DDH) is a spectrum of anatomical abnormalities of the hip joint due to deviation in normal hip development during embryonic, fetal and infantile growth periods which can cause developmental disability such as abnormality of gait, shortening of leg and other complications. The study was conducted as a preliminary study to identify the effectiveness of custom made brace named OT's Hip Abduction Brace among DDH children being referred from North region hospitals. After 2 months of intervention, ultrasound and clinical examination found that there were reduction in  $\alpha$  angle of hip joint and increase in  $\beta$  angle which shows hip stabilization using the OT's Hip Abduction Brace. Level of satisfaction was also found high among parents from the application of the brace to their DDH children. No complications were found from wearing the brace besides parents expressed satisfaction on the physical look, easiness of wearing the brace, good durability and they believed in the intervention by using the brace provided. Statistical analysis conducted also identify that there was significant association ( $p=0.007$ ) between  $\alpha$  and  $\beta$  angles of hips joint amongst children with the DDH after 2 months of OT's Hip Abduction Brace.

## **ACKNOWLEDGEMENT**

Alhamdulillaahirabbil ‘Aalamin dipanjatkan kepada Allah SWT kerana dengan rahmat dan hidayahNya jualah saya dapat menyelesaikan penulisan tesis ini. Selawat dan salam juga diaturkan kepada nabi besar Muhammad SAW. Saya menjulang sepenuh penghargaan dan terima kasih kepada penyelia saya iaitu Dr Akehsan Bin Hj Dahlan atas segala nasihat, dan keperihatinan semasa menyempurnakan tesis ini. Beliau telah banyak memberi sokongan, dorongan, bantuan, dan bimbingan kepada saya untuk menyempurnakan tesis ini. Saya amat menghargai kesabaran beliau yang sedia berkongsi maklumat dan kapakaran, senang dihubungi dan cepat dalam tindakan semasa sesi penyeliaan sepanjang pengajian ini. Semangat kesabaran, pembacaan yang teliti, minat terhadap kajian ini serta maklumbalas daripada beliau yang menyakinkan amat membantu untuk menyempurnakan tesis ini.

Ucapan terima kasih juga saya tujukan kepada Penyelia Bersama saya iaitu En Chandra Kannan A/L Thanapalan yang telah memberi nasihat dan komen tentang tesis saya. Bimbingan, pandangan dan tunjuk-ajar yang dihulurkan oleh kedua-dua orang penyelia saya dari UiTM banyak membantu kepada kejayaan tesis ini. Ribuan terima kasih diucapkan kepada dua orang pakar paediatric orthopaedik Hospital Pulau Pinang, iaitu Dato' Dr Zulkifli Bin Osman dan Dr Mohd Firdaus Hafni Bin Ahmad atas kesudiaan memberi bantuan, pandangan dan saranan bagi memurnikan dan menentusahkan instrumen kajian.

Saya ingin merakamkan lestari budi kasih yang tidak terhingga kepada isteri tercinta, Siti Nurshahida Binti Nazli di atas segala pengorbanan, dorongan dan kesabaran beliau mengiringi saya mengharungi segala cabaran sepanjang tempoh pengajian ini. Beliau juga yang menemani dan memberi sokongan yang tidak terperi kepada saya. Tidak lupa, khas untuk ketiga-tiga orang anak kesayangan saya, Muhammad Fayyadh Rajid, Nur Aludra Ameena dan Muhammad Fayyim Rafsal yang amat sabar dengan tanpa kehadiran saya di sisi mereka semasa tempoh pengajian ini. Merekalah yang menjadi sumber inspirasi kepada saya ketika menyiapkan tesis ini. Semoga tesis ini menjadi pendorong kepada mereka dalam usaha mencapai kejayaan.
