ACKNOWLEDGEMENTS

In the name of Allah S.W.T, The Most Gracious, The Merciful. Alhamdulillah, I am grateful to Almighty Allah S.W.T for providing me with the strength to successfully complete the research for this case study. First and foremost, I would like to express my heartfelt gratitude to Dr. Farah Liza Azizan, my Technology Entrepreneurship (ENT600) lecturer, for teaching and guiding us through the completion of this report. During the writing this report, I also learned something new. I will not be able to finish this report without her. I am also grateful to my classmates and family for their support and assistance in completing this project. Finally, I am grateful for the opportunities to complete my analysis on the Top Glove Company .

EXECUTIVE SUMMARY

The world's largest glove manufacturer is Top Glove Corporation Berhad. Malaysia is where the company's manufacturing operations are located. The focus of this report is on Top Glove's medical gloves, which will be identified and analysed in this company analysis. Latex allergy is a problem associated with medical gloves. So, in order to solve the problem, a solution is required. The solution that provides is mangosteen peel are mixing with natural rubber latex. This is due to the presence of xanthones in mangosteen peel, which have biological effects such as anti-allergy, antibacterial, and anti-viral. It aids in the treatment of skin allergies caused by latex protein. As a result, it is a viable option for preventing skin infection.
