I. Acknolegment

Upon the completion of this report , I would like to express my gratitude to many parties. First of all, I would like to express my deepest thanks to my lecturer, Dr.Farah Lina Binti Azizan for her support and precious guidance which were very valuable for my study both theoretically and practically. It is such an opportunity to be supervised by great persons and I consider myself as a lucky person. My acknowledgement also goes to my colleague for helping upon finishing this case study writing. I would like to express my utmost sincere and gratitude to my parents for supporting me from the beginning to the end.

ii. Executive summary

The vision of Top Glove is “we strive to be the world’s leading manufacturer with excellent quality glove products and services that enrich and protect human lives”, which means manufacture a glove that can protect the human health and safety as well. While, the mission is “to be a world class glove manufacturer by providing top quality products with excellent services through continuous improvement and innovation” which mean continuously reform and change to manufacturer a best quality of glove products. Top glove corporation berhad’s business direction is to produce high quality gloves consistently with efficient low cost. The main strategy for the successful of top glove would be cost leadership strategy.

Besides, Top glove was able to reduce thickness of glove without lower the quality of glove. Top Glove offers a broad and distinct product range fulfilling demand in both the healthcare and non-healthcare segment. Top glove organisation is aggressively expanding its business scope and on the lookout for merger and acquisition opportunities in similar and related industries. Further, The company expand their business through diversification into related business or diversification by acquisition of an existing business. Acquisition of the company in the same industry will improve the company strengthin production, reaching customer, and operation.

1.2 Product / Services

Top glove mainly supply latex glove which are divided into 2 types of glove. They 2 types of glove are Natural Rubber or latex glove and Nitrile rubber. Latex glove mostly used for medical purpose. For example Latex surgical glove. Surgical Glove is a disposable device intended for surgical purposes that are worn on the hand of healthcare personnel during surgery to prevent contamination between the healthcare personnel and the patient. The other medical glove is called double donning latex surgical glove. Double Donning Surgical Glove provides double reduction on risk of patients' blood exposure. The gloves provide double assurance to avoid cross-infection between the users and patients. Colour identification alerts users on any perforation of the glove. Natural rubber glove also can be use for kitchen or handling food. For food handling they got latex disposable glove. Latex Disposable Glove is a disposable device intended for food handling to prevent chemical substances migrating from the food contact material to the food and also to protect food from changes in taste or odor.

Nitrile glove also can be used for medical purpose which use nitrile surgical glove. The uses are almost similar to the latex glove. Besides that, they got nitrile examination glove to fullfill the medical demand. Nitrile Examination Glove is a disposable device intended for medical purposes that are worn on the examiner's hand to prevent contamination between the patient and examiner. There also high risk Nitrile industrial glove. High Risk Nitrile Examination Glove is designed to provide the user with extra protection over the hand with PPE 89/686/EEC Category III Complex Design certified by SATRA.
