**Thesis submitted in fulfilment of the requirements
for Bachelor of Information Technology (Hons.)
Business Computing Faculty of Computer and
Mathematical Sciences**

July 2020

ACKNOWLEDGEMENT

Alhamdulillah praises and thanks to Allah S.W.T because of His Almighty and His utmost blessings, I was able to finish this project within the time frame. Firstly, my special thanks and gratitude goes to my beloved supervisor, Dr Hasiah Binti Mohd@Omar who gives guidance, comments, suggestion time and contribution in this project. Not to be forgotten, my lecturer for CSP600 and CSP650, Miss Nik Marsyahariani Bt Nik Daud for assist and guide given through these two semesters. In addition, an appreciation and special thanks to lecturers and others who always give ideas directly or indirectly to improve this project development.

I am indebted to my beloved parents and other family members who keep on giving their endless support and motivation. Without all their support, I would not be able to complete my research. I would like to give my gratitude to my dearest friends who help me to finish this project, guide me and keep on lending their hand to help me through this final year project progress. Finally, I wish to thank all the people whose assistance was a milestone in the completion of this project.

ABSTRACT

E-Marketplace for Muslim Products (EMF) is a system or e-marketplace website where the user involve can be a buyer or a seller in this system. EMF is developed to allowed the buyer to have more exposure towards the Muslim Products and enable them to buy the products directly to the seller. By using the adapted waterfall model, the system will be developed using the sequential step by the adapted waterfall model. It has six steps which is planning, analysis, design, development, testing and documentation. Before the development of the system performed, the developer will be using several diagrams to design how the system will works. After the system has been developed, it will be tested by the four users including one-person act as the seller. Then the users will answer the questionnaire using the SUS Score question. Based on the result, the average for the total SUS Score is 70 which is above the passing line of usable system. This concludes that majority of the users are satisfy with the system that has been developed.

TABLE OF CONTENTS

CONTENT	PAGE
SUPERVISOR APPROVAL	i
STUDENT DECLARATION	ii
ACKNOWLEDGEMENT	iii
ABSTRACT	iv
TABLE OF CONTENTS	v
LIST OF FIGURES	viii
LIST OF TABLES	ix
CHAPTER 1: INTRODUCTION	
1.1 Background of Study	1
1.2 Business Process	2
1.3 Problem Statement	3
1.4 Objective	5
1.5 Scope	6
1.6 Significance	8
1.7 Framework	9
1.8 Gantt chart	9
1.9 Conclusion	11
CHAPTER 2 : LITERATURE REVIEW	
2.1 Introduction	12
2.2 Electronic commerce	12
2.3 Electronic Marketplace System	13
2.4 Electronic Marketplace Business Model	15
2.4.1 Types of electronic marketplace	15
2.4.2 Features of electronic marketplace	17

2.5 System Development Models	18
2.5.1 Waterfall model	18
2.6 Similar existing System	20
2.6.1 Agoda	20
2.6.2 Shopee	23
2.6.3 HaYib	26
2.7 Implication of Literature Review	29
2.8 Conclusion	31

CHAPTER 3: METHODOLOGY

3.1 Introduction	32
3.2 Project development methodology	32
3.3 System Planning	34
3.3.1 Preliminary Investigation	34
3.3.2 Data collection	34
3.4 Analysis	35
3.4.1 Functional Requirement	35
3.4.2 Non-functional Requirement	35
3.5 Design	36
3.5.1 Context Diagram	36
3.5.2 Data Flow Diagram (DFD) Level 0	37
3.5.3 Entity Relationship Diagram (ERD)	38
3.5.4 Table of information	39
3.5.5 User Interface	41
3.5.6 Site Map	42
3.6 Development	43
3.6.1 Hardware Specification	43
3.6.2 Software Specification	43
3.7 Testing & Evaluation	44
3.7.1 Expert Evaluation	44
3.7.2 User Evaluation	44
3.7.3 User Testing	45
3.8 Documentation	46
