### **EXECUTIVE SUMMARY**

This subject is an attempt for student to know how to understand and study the business theory of a certain company that can be put into practical situation. Hence as for me I was giving an opportunity to study on the business theory and rules which run a sensor manufacturer product which is Hunan Rika tech.co Ltd company based in China

In the first section, I need to study on the purpose of this case study and the problem statement faced by this company. Next section, I was giving a task to study on their company background and choose a product from their company and figure out on how the product works in term of technology parts. Plus, I also collect the information on how Hunan Rika dealing and manage their business strategy in achieving their business goals and perform an effective management. Most information I collected from their company's website and few secondary sources as well to supports all the facts.

In this case study, I analysed the strength, weakness, opportunities and threats of this company in real business using SWOT analysis. Thus, in the last section I was given to came out with few solution that can overcome or improve the need and demand from consumers.

## 2.2 Organizational structure

## 2.3 Products / Services

Hunan Rika Tech Co., Ltd produce various of products. Generally, their products are CE, ROHS certificated. Products that they had been produced and widely used in solar energy, smart agriculture, aquaculture, sewage treatment, air quality, wind power generation and relative fields of meteorological environment monitoring. As for my case study I want to pick one of their products which is focus on soil sensor. They had come out with various type of soil sensor.

Here are the products of soil sensor and their specifications:
