Programme : AP 111–Program of Town and Regional Planning

Faculty : Faculty of Architecture, Planning & Surveying

Title : The Level of Accessibility in the Recreation Park at
Taman Tengku Anis Pasir Mas Kelantan

Signature of Student : 

Date : 2 August 2021

ABSTRACT

The development of recreational parks has become a significant concern in today's society. This is because the community now recognises the value of recreational amenities. Furthermore, in accordance with the government's proposal to develop a society that is healthy, active, and caring. The purpose of preparing this study of recreational areas is to gain a true image of the situation and identify the issues that exist in terms of recreational area accessibility as well as provide a proposed plan to develop the area. To achieve this goal, all aspects need to be known whether in terms of theory, concept, problem and potential of the study area. The research was carried out using observation and secondary data. As a result of the analysis conducted, it was found that the recreational park in Taman Tengku Anis Pasir Mas could not fully meet the needs of visitors. The provision of recreational areas that meet the needs of users will be able to attract visitors. Overall, the development of this recreational area can have a positive impact on the development of the environment. With the findings that have been identified, then proposals are proposed to overcome the problems in the study area. With the maintenance and management will determine whether or not the recreation area is successful as an active recreation area.

ACKNOWLEDGEMENT

Bismillahirrahmanirrahim....

In the name of Allah, the Most Gracious, the Most Merciful. Thanks to him because with his generosity, the final study of this Diploma in Town and Regional Planning can be completed within the stipulated period.

It is with great pleasure that I would like to thank Ms. Norsyazlin Binti Mohammad Rosli (Gs) as the supervisor of the final study entitled The Level of Accessibility in the Recreation Park at Taman Tengku Anis Pasir Mas Kelantan. All his encouragement and guidance during the period of this study cannot be forgotten and all his guidance became a guide for me to conduct research in the future. I also want to thank Dr. Syazwani Ahmad (PhD) as Planning Project Paper Coordinator, for her guidance, tolerance, supervised and reminded us the important dates during this semester. Not forgetting the other lecturers who also helped.

In addition, to the colleagues who provided support during the success of this study, the results of the three-year friendship gave a lot of encouragement to me. Millions of thanks also to the parties directly or indirectly involved in the preparation of the writing of this study.

Finally, many thanks to both my parents who have given a lot of support and encouragement in making this study a success. May the expected success be ours. In Shaa Allah....
