PROJECT :
CLOTH FOLDING MACHINE

SUPERVISOR'S NAME :
SIR MIQDAD BIN KHAIRULMAINI

LECTURER'S NAME :
DR. ABDUL AZIZ BIN YUSOF

GROUP :
J4EM11105D

NO.	NAME	STUDENT ID
1	ABDUL RAHMAN BIN RAMLAN	2017226254
2	AHMAD ZIKRY BIN AINI	2017228438
3	MOHAMAD AZARUL NAIM BIN NORAZLAN	2017249792
4	MOHAMAD NURAMMAR ADHA BIN MOHD YUNUS	2017249534

ACKNOWLEDGEMENT

The first thing that our team need to give a highly appreciation to all people who have provided for our team the possibility to complete our final year project which entitled as Prototype of Mini Machine. A special gratitude for our only supervisor, Sir Miqdad bin Khairulmaini, who contribute in simulating, suggestions, encouragement and become our guidance and coordinator of our final year project. Plus, with the help our supervisor in fabrication process make our team motivated to make the Clothes Folding Machine fully functional. Thus, a special thanks to Dr. Abdul Aziz bin Yusof as our lecturer of Mechanical Engineering Design (MEC 332) for his guidance in the lecture and workshop sessions.

Besides that, to finish the machine, it needs a good commitment from group members and cooperate each other and give some appreciation to the crucial role of group members from the start of the project until the end of the final year project.

Last but not least, an exclusive thanks to our family who gave us full support and try to advise us to accomplish the target that we need. A special acknowledgment to the assistant engineers that helps us during the workshop sessions by giving advices and comment about our final year project which is Clothes Folding Machine.

ABSTRACT

Clothes Folding Machine is machine that helps a user to save the time to fold a cloth. The main target of the project is to develop a machine which is portable cloth folding machine. The main function of the Clothes Folding Machine to save the energy and save some time in folding a cloth. The size of the should be smaller due to fabricate in miniature size compared to the other existing cloth folding machine.

The Clothes Folding Machine was developed with the mechanical components which is motor. The function of the motor in the machine is to reduce the human force during handling this product. This Clothes Folding Machine is made of mild steel, wood, plastic and plywood and this machine is help by the motor.

The Clothes Folding Machine is commonly to ease the housewives and the laundry shops in Malaysia. Based on our research, this machine is not made out of production yet but it still in prototyping.

TABLE OF CONTENT

CHAPTER 1 : INTRODUCTION	1 - 8
1.1 Problem Statement	3
1.2 Objectives	4
1.3 Significance of the Project.....	4-5
1.4 Project Management.....	6-8
CHAPTER 2 : DESIGN PROBLEM DEFINITION	9-18
2.1 Market Analysis.....	10-16
2.1.1 Targeted Market and Estimation of Market Size.....	10-12
2.1.2 Customer Needs and Identification.....	13-16
2.2 Competitive Benchmarking Product.....	17
2.3 Final Product Design Specification.....	18
CHAPTER 3 : CONCEPT GENERATION AND SELECTION	19-27
3.1 Feasible Concept.....	20
3.2 Morphological Analysis.....	20-
3.2.1 Concept 1.....	22
3.2.2 Concept 2.....	23
3.2.3 Concept 3.....	24
3.2.4 Concept 4.....	25
3.2.5 Concept 5.....	26
3.3 Selection of Final Concept.....	27
3.3.1 Pugh Chart Analysis.....	27
CHAPTER 4 : EMBODIMENT DESIGN	28
4.1 Product Architecture.....	29

4.2 Configuration Design.....	30-32
4.2.1 List of Parts.....	30
4.2.2 Details standard part selection.....	31-32
4.3 Parametric Design for Custom Parts.....	33
CHAPTER 5 : DETAIL DESIGN.....	34
5.1 Engineering Drawing	35
5.1.1 Detail Drawings of Manufactured Parts.....	35
5.1.2 Assembly Drawings.....	35
5.1.3 Exploded Drawings.....	35
5.1.4 Bill of Material.....	35
5.2 Costing Evaluation.....	35
5.2.1 Break Even Analysis.....	35
CHAPTER 6 : PROTOTYPING AND TESTING.....	36-47
6.1 : Fabrication Process.....	37
6.2 Testing of Design : Theoretical Calculation and Simulations.....	39
6.3 Results and Discussion.....	40-47
CHAPTER 7 : CONCLUSION AND RECCOMENDATION.....	48-49
7.1 Conclusions on Designed Product.....	49
7.2 Future Works.....	49
REFERENCES.....	50
APPENDICES
