2	MUHAMAD ALIFFUDDIN BIN A. LAMIN	2017228504
3	MARSHA ELSIE BIDDULP BINTI MOHD SHAHZAN	2017253816
4	MUHAMMAD AMIR SYAHMI BIN AHMAD	2017228088

ACKNOWLEDGEMENT

First of all, we would like to expressing our gratitude to god as finally we were able to finish our project between this 14 week. This project was run smoothly and had been done with all afford by all the group members even though had a lot of problem but we had face and go through it one by one.

Besides that, we also want to express our thanks to our supervisor, madam Aina Maya Munira Binti Ismail that always guide us during the project period. She always gives a support, idea and understands us during this 14 week. Sincerely, she is the one that inspired us in giving the idea to produce the Hydromaid.

On the other hand, big thanks also we address to MEC332 lecturer, sir Mohd Noor Halmy Ab Latif that also gives us knowledge about designing and planning the project. We had learn a lot from him and successfully complete the final report for the project.

The last but not least, thanks to our beloved teammates and friends that always gives their effort to ensure the successfully of the project. Hope that all the effort will give benefits to us and alsoin our future. Million thanks also to our classmates that gives us opinion and comment regarding the project so that we can improve our project in the future.

ABSTRACT

In this report, we are assigned to produce a mini machine product. Our teams are inspired by our supervisor, madam Aina Maya Munira Binti Ismail to produce a product that uses a hydraulic system and a concept of robotic arm but had a function for cleaning process. Then, the Hydromaid ideas is created. Our team doing a researched about Pascal's Law principle which stated if there is increasing of a pressure in any point of the confined fluid, there will be an increasing of the pressure in all point in the confined fluid. Then, we combined all the researched to construct the ideas and then Hydromaid is created.

Table of Contents

Acknowledgement.....	vi
Abstract	x
List of Figures	xi
List of Tables.....	xii
CHAPTER 1 Introduction.....	1
1.1 Problem Statement	1
1.2 Objectives.....	1
1.3 Significance of the Project	1
1.4 Project Management.....	2
CHAPTER 2 Design Problem Definition	3
2.1 Market Analysis	3
2.2 Competitive Benchmarking Products.....	5
2.3 Final Products Design Specification	5
CHAPTER 3 Concept Generation and Selection.....	7
3.1 Feasible Concepts.....	7
3.2 Morphological Graph.....	8
3.3 Selection Of Final Concept	15
CHAPTER 4 Embodiment Design.....	16
4.1 Product Architecture	16
4.2 Configuration Design	17
4.3 Parametric Design for Custom Parts	20
CHAPTER 5 Detail Design.....	24
5.1 Engineering Drawing	24
5.2 Costing Evaluation	34
CHAPTER 6 Prototyping and Testing.....	37
6.1 Fabrication Process	37
6.2 Testing of Design	39
6.3 Results and Discussions Simulation.....	40
CHAPTER 7 Conclusion and Recommendation	47
7.1 Conclusions on Designed Product.....	47
7.2 Future Works.....	48
CHAPTER 8 Reflection on The Design Process	49
8.1 Strength	49
8.2 Weakness.....	50
