ABSTRACT

In this study, the researcher will examine the factors that influence the payment of zakat among entrepreneurs in Shah Alam by looking at three independent variables (IV) which are relationship between the awareness of zakat payment obligation between entrepreneurs, facilities provided to entrepreneurs to make a zakat payment and relationship between the role of media in giving awareness on zakat obligation. Data will be analyzed by using standard multiple regression in order to examine whether there is relationship of not between the three independent variables and the dependent variables which is factors that influence the payment of zakat. The target respondent also consist of entrepreneurs that run whether a small business or large business in Shah Alam. The district that involved are Seksyen 7, Seksyen 13 and Seksyen 14. This study used quantitative method by using the questionnaires as instruments and analyze the data by using Likert Scale and SPSS. The respondents involved in this study is 100 respondents. The research also used reliability test in order to test this study is reliable or not, correlation coefficient to identify the relationship between variables, and standard multiple regression.
