Date: 29 MARCH 2014

### **ACKNOWLEDGEMENT**

First and foremost, I would like to offer thanks to Illahi who bless me throughout my practical at Unit Kejuruteraan Dan Penyelenggaraan (UKP), Hospital Universiti Sains Malaysia (HUSM) Kubang Kerian, Kelantan and has prepared a report on some Practical Training syllabus (BSB351). Here also I am pleased to express my sincere thanks to my parents who have been giving encouragement, support and encouragement to me during the practical training.

I also would like to thank my supervisors lecturer, En Amir Fasha Mohd Isa who have helped me to complete this practical report properly and successfully. I also want to thank the department maintenance HUSM for accepting me for the practical training there.

Other than that, I would like to thank my practical supervisor, Mr Ir Suwandie Bin Makhtar for providing information about maintenance work in HUSM. Not forgetting all citizens UKP, I would like to thank you for taking the time to provide guidance and knowledge to me to complete this report.

Last but not least, I would like to once again thank god for giving me the opportunity to carry out practical training sessions and also bless my efforts to make this report to be completed properly.

Thank You.

### **ABSTRACT**

The building maintenance can be defined as the regular inspection of all part of the building and the execution of work necessary to keep the structure, finishes and fitting in a proper and acceptable state of repair, including decoration both internally and externally (Cripps, 1984). The British Standard 8210 defined maintenance as the combination of all technical and administrative action intended to retain an item in, or restore it to a state in which it can perform its required function.

In HUSM, the maintenances of UKP always emphasize on the building condition that are always in good condition and safe to use in a long time.
