and Japan on Malaysia Economy

Signature of Student : 

Date : June 2018

ABSTRACT

The developed country has influenced and impact the economy of developing country has been hot issue facing the economists. This paper examines the impact of macroeconomic variables of China and Japan on Malaysia economy. Basically, macroeconomic variable such as inflation rate, exchange rate and interest rate play a key role in measure the economy growth of any country are used in the study. The Malaysia economy in the research are measure using Gross Domestic Product (GDP) of Malaysia and the sample period runs from year 2000 until 2012 covering one global economic crisis 2008/2009 by using time series data. This study implies that knowing which country exactly affect in the process of transforming Malaysia's economy toward good performance and high income nation in the future.

ACKNOWLEDGEMENT

Firstly, I wish to thank God for giving me the opportunity to embark on my Bachelor and for completing this long and challenging journey successfully. My gratitude and thanks go to my supervisor Sir Basaruddin Shah Basri.

I would like to express my very great appreciation to coordinator, Dr Roslina Haji Mohamad Shafi for her valuable and constructive suggestions during the planning and development of this research work. Special thanks to my colleagues and friends for helping me with this project.

Finally, this thesis is dedicated to my lovely father and mother for the vision and determination to educate me. Alhamdulillah.
