ACKNOWLEDGEMENT

With the deepest gratitude, I would like to thank every person who has come into my life and inspired, touched and illuminated me through their presence. First and foremost, I would like to thank my family for their unlimited support. I'm very much grateful to have them around me through ups and downs upon completing this report.

Secondly, to Technic Grand Sdn Bhd for giving me once in a lifetime chance to worked with them. Be working with the best team is very priceless and definitely helped me in the real working environment in the future. The 4 months experience can't never be compared with any other company that I have worked with.

For generously sharing their wisdom, I pay homage to En. Rozaimi, En. Faiz and all staffs in Technic Grand Sdn Bhd for their kindness to lead and showing the correct way of doing all the works related to this report and without hesitation giving information needed. My precious friends for the stressful yet exciting brainstorming and knowledge share sessions and also other who involved directly and indirectly making this report a success. From my bottom of my heart, I thank everyone who involved from the beginning until the end and hopefully this report can be a reference for those who needed.

Thank you very much.

ABSTRACT

Allhamdulillah finally I can prepare my report, entitled the usage of polyurethane injection in waterproofing works. After undergoing practical training for 3 months under a TGC SDN BHD, I get a lot of new experiences and learn the process of conducting a project. Based on my report , I can see how the worker performs work polyurethane injection from the start to the end of the process is. My case study on the water tank at Felda Tenang, Besut, Terengganu leak due to high water pressure in the water tank that had caused the floor of the tank cracked. The water tank is the main water tank that stores water and supply water to the villagers in the village. They use polyurethane injection to prevent more serious damage. The conclusion is the maintenance management is important for give a comfort to the occupant and it also help to prolong the life cycle of the building.
