## **ACKNOWLEDGEMENT**

I would like to express my sincere gratitude to my respective supervisor, Mr. Loo Chee Hooi for his kind encouragement and advice within these 16 weeks of internship training. His invaluable thoughtful advice, expert guidance and time spent for discussions are duly appreciated.

Moreover, thanks to my team members, Mr. Zul Haili, Mr. Hafiz, Mr. Fikri, Mr. Hannan, Ms Samihah and Mdm. Elina for their help and explanation for me to complete my assigned tasks. I also would like to thank Pn. Aida Afinaa binti Abdul Ghani as programme coordinator and other Building Surveying lecturers for their very helpful suggestions, advice, and help.

Sincere thanks also go to all staffs in P-CON Building Surveyors Sdn. Bhd, my friends, and classmates for their help and support alongside the progress of this internship. Lastly, I would especially like to give my appreciation to my beloved parents, Zaini binti Shafie, siblings and other family members for their uncountable support and encouragement from the first day I took this course until it is completed.

## OBJECTIVES

The purpose of Industrial Training is to expose students to real work of environment experience and at the same time, to gain the knowledge through hands on observation and job execution. From the industrial training, the students will also develop skills in work ethics, communication, management and others. Moreover, this practical training program allows students to relate theoretical knowledge with its application in the manufacturing industry.

The objectives of industrial training are:

- i. To give students supervised opportunities to experience the essential practical tasks emphasised in their professional study.
- ii. To provide opportunities to apply their acquired skills and knowledge in working life.
- iii. To build the strength, teamwork spirit and self-confidence in students life.
- iv. To build a good communication skill with group of workers and learn to learn proper behavior of corporate life in industrial sector.
- v. Internship programs will increase student earning potential upon graduation.
- vi. To expose students to real work environment experience gain knowledge in writing report in technical works/projects.
- vii. Stabilize the values and concepts related to the knowledge and work.
- viii. Obtain feedback to develop the educational plans and courses which suit with local reality.
