ABSTRACT

Practical Training refers to work experience that is relevant to professional development prior to graduation. One of the requirements for the students of Diploma in Building Surveying to complete the program is the students must complete at least 16 weeks of Practical Training. It started on 1st December 2016 and end on 31March 2017.

In term of relationship, I was lucky enough to work with a group of enthusiastic and communicative people, who for whatever reason willing to share their knowledge and experience of what they are doing. Besides, the atmosphere at SNCIPTA BINA SDN. BHD. is unique and hope that it will stays that way. The bond was created between me with my supervisor and the staffs at Contract and Construction Department. The experience gained has been an eye opening to me and I thoroughly recommend other students to do their industrial training at SN CIPTABINA SDN. BHD. enable them to have the same experience as I had at SN CIPTABINA SDN. BHD.

ACKNOWLEDGEMENT

Practical training industry has teaches how to construct an excellent and commit report on the company background and able to experience real life work in the construction industry. Special thanks to our beloved supervisor En. Khairul Nizam that guide us throughout the whole process of the practical training and advise me in many ways.. Also special thanks to Sr. En. Nor Amin, the person in charge of supervising us based on our report and spending most of the time help and guide us and giving information in order to complete this report

Last but not least, special thanks to our beloved friends and family for supporting and give us a lot of advice and motivational tips to ensure we can finish this final project report within the deadline. They have helped us in many way such us giving us guideline and information how to create an excellent report.
