ACKNOWLEDGEMENT

In the name of God, The Most Beneficent and The Most Merciful, and with the blessing of his messenger, The Holy Prophet, I have completed the report for the subject Practical Training (BSR 360). Here, I would like firstly express my endless appreciation to my parents without them I would not have gone this far in completing my study and this report. Furthermore, my sincere thanks to my supervisor, Sr. Mohd Nurfaizal for guiding me in completing this report, and not forgetting all the lectures in Department of Building Surveyor. The endless guides that have been provided would be much appreciated.

A million thanks to En. Rizman Bin Mustafa, En. Zairulanuar Bin Yusof and En. Abu Zarem Bin Zainuddin from the Property Management of Perbadanan Kemajuan Negeri Selangor (PKNS) and not to forget to all my colleagues and friends that helped me along the way and sacrifices their time to share and spare some important knowledge and information throughout the completion of this report.

Besides my advisors, I would also want to thank graciously to all the parties involved directly or indirectly in contributing their expertise, support and guidance that had helped me in completing this report and achieve all of the objectives and at the same time, accomplishes more about the topic that I has been researched.

Realizing that this study is meaningless without the acknowledgement of The One made it possible, once again thanks to The One and Only God, for a blessed family, friends, colleagues and giving me the peace of mind, body and soul throughout the completion of this study.

Thank You.

1.5 FACTORS OF SELECTING AIR CONDITIONING SYSTEM	16

ABSTRACT

This report explain on the process and flows of centralized air conditioning system which is related to the building services of a building. The air conditioning system is one of the most important building services because air conditioner help to improve the air quality environmental of the building which help to build the comfort of the users and occupancy. From the observation and research centralized air conditioning system is really hard to maintain, its need a lot of work and inspection to avoid from any major breakdown to the system that can lead to building services not functional. This report explain on the detailed of the process and step of centralized air conditioning system and also describes on the component that is need in the centralized air conditioning system.
