1.0 Introduction

In industry of services there is wider business that can make profit to us which is can achieving economic growth. Our prime minister Dato Sri Mohd Najib Bin Tun Abdul Razak stated that our country would be focus on how consumer used the resources efficiently in a sector that has a competitive advantage and provided benefit to the country.

The focus is on to several key of economic area our country, we would happy to support the government to make our country more variety in business area. We take the opportunity in business sector which is one of the 12 major economic areas of the country. According to the 10 Malaysian plan their want than 12 industry become increases which the industry is the key economic area in Malaysia. There industry are oil and gas, palm oil and related product, financial services, whole sale and retail, tourism, information and communication technology, education, electrical and electronic, private healthcare, agriculture, greater kuala lumpur and lastly is our aim of sector is business services.

Car wash is a good services business that suitable to run on for the people who is started to try involved in business services area. The most important for running a business car was is a suitable location with basic equipment and a few workers to the job. As started in the news Bernama that car wash is profitable business when student UM raise their fund for 'BAKTI SISWA SARAWAK 2000"project.This is the second time their do the project. At the fist time the projects prove that this project is success.

The car wash also gives benefits to our environment. The chemical oxidation of car wash industry as effort to decreases water pollution. Wastewater from car washing station contain a number of impurities such as sand and dust ,free oil ,grease, oil/emulsion carbon ,asphalt, salt, surfactant and organic matter, which is discharged directly into municipal sewage treatment plant.

Technologies now become more exciting than before. What today seems like science fiction could tomorrow be reality. This is because there is no reason why objects cannot be created on an atom by atom basis, the proof for this being provided as far back as 1959 by American physicist and Nobel Prize winner, Richard Feynman. The number of uses that can be made of nanotechnology in the car industry is enormous. Take, for example, scratch-free windscreens: If one mixes saline, large molecules made of silicon, metal and alcohol groups, with water, these convert into silanols, which in turn develop into blobs several nanometres in size. We see this as our opportunity to involve car wash business with the nanotechnology.

The uniqueness of our business, we provide machine from Ogawa which is give air pressure massage target vital reflex points on calves, ankles and feet. It effectively help stimulates blood circulation, relieves stiff muscles, muscles pain and sore feet. With the new technology, its would give combination on strong kneading action, 8 protrusion point on stepping board,3D roller massage its give u a most relaxing and revitalizing massage experience.
