## ACKNOWLEDGEMENT

First of all, a full gratitude to Allah S.W.T., I have been given the opportunities to complete the Practical Training Report perfectly on the stipulated time given. I would like to dedicate my appreciations for those who had sacrifice a lot and spend much time to lend a helping hand, giving a supportive advices and constructive criticism and opinions in finishing this practical training report especially to Pn Nuzaihan Aras BtAgusSalim who has been a very encouraging supervising lecturer for guiding me throughout the completion of this report. Special thanks also dedicated to those who are directly involved in helping me experiencing my practical training phase in F.N COMUNICATION SDN. BHD. especially to the site supervisors, En Kamarul Azman Bin Ghaffar who have been very cooperative and supportive during my practical training and been very bountiful by giving me beneficial advices and knowledge. Also, thousands of thanks also dedicated to En Suhaimi Bin Kamaruddin site engineer of the project who have been very helpful guiding me along in my training phase for giving me this precious chance to be a part of his team for about 4 months. Millions thanks also dedicated to Encik Nor Amin MohdRadzuan, the practical training coordinators and all the lecturers of Building Surveying Department that have been extremely helpful all the way through this practical training semester. Not to forget, thank you to my parents and supportive family for their morale and financial support and encouragement in preparing this practical training report. Thank you.

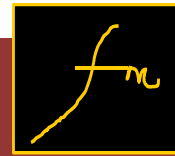

## ABSTRACT

Generally, this practical training report clarifies the information about all of the works, processes and methods on the Construction of Road in F.N Communication Sdn.Bhd. This practical training report is prepared based on day to day and comprehensive program of construction of road gained throughout about 4 months of practical training on a construction site of a F.N Communication. This practical training report is started with explanation and clarification of company background and background of project. The construction of road in a F.N Communication isn't as easy as it seems in management and planning. Based on the observation made, this construction involved a very detailed methods of construction and also specific materials that need to be done by skilled workers and also involves a few parties. Besides that, the quality of the workers and the construction materials would also affect the fluency level of the construction works. Also, in this practical training report, the method statement or the work instruction of the construction road methods will be explained thoroughly. Next, this report also explained about the materials used for the construction and the equipment used by the general workers. Moreover, the common problems faced involving in this construction work is also explained in this report along with its suitable steps of solutions. As the conclusion, this practical training report can explain in details about the Construction of Road in F.N Communication practically to all of the readers.
