

# AUTOMATIC PARKING SENSOR SYSTEM

MUHAMMAD AFFIQ DANIAL BIN AMRAN  
MOHAMAD SYUKRI BIN FADZIL

A project report submitted to the Faculty of Electrical Engineering,  
Universiti Teknologi MARA in partial fulfillment of the requirements for the award  
of Diploma of Electrical Engineering.

FACULTY OF ELECTRICAL ENGINEERING  
UNIVERSITI TEKNOLOGI MARA  
MALAYSIA

SEPTEMBER 2015

## **ACKNOWLEDGEMENT**

Alhamdulillah.

Praise to Allah S.W.T The Most Gracious, The most Merciful, there is no power no strength save in Allah, The Highest and The greatest, whose blessing and guidance have helped us through the process of completing this project. Peace and blessing of Allah be upon our prophet Muhammad S.A.W who has given light to mankind.

Our deepest gratitude goes to my supervisor Mr. Kamaru Adzha bin Kadiran at for all the knowledge, motivation and support that he had given us in completing this thesis. Lots of love of our heart to our family especially our parents whom always given us their support.

We sincerely and almost thanks all of our teachers, lectures and all of our friends for helping directly or indirectly. May Allah bless all of you. Amin thank you very much.

## **ABSTRACT**

The Automatic Parking Sensor System using develop in this project is to determine the number of free space at car park using LDR sensor and microcontroller while the result will be display at Liquid Crystal Display (LCD). The ability of this project is to count accurately and automatically the number of free space at the parking in real time. The principle objective of this project was to provide the information of parking spaces either it is still available. This project is built base on the combination of hardware and software. The hardware part is use Arduino microcontroller to control whole system. The software part for the system has coded in C programming language. The LDR sensor will be able to detect vehicles that park and the counted number will be displayed on LCD. The output of this project is a complete device counter that can count the number of available vehicle at the parking on LCD and this paper will cover for the whole operation the system of Automatic Parking Sensor System.

## TABLE OF CONTENT

CHAPTER	TITLE	PAGE
