

HOME SECURITY SYSTEM

MOHAMAD ZUL HUSNI BIN MOHAMMAD NAZRI

MUHAMMAD SYAHRAN BIN ISMAIL

A project report submitted to the Faculty of Electrical Engineering,
Universiti Teknologi MARA in partial fulfillment of the requirements for the award of
Diploma of Electrical Engineering.

FACULTY OF ELECTRICAL ENGINEERING
UNIVERSITI TEKNOLOGI MARA
MALAYSIA

SEPTEMBER 2015

ACKNOWLEDGEMENT

We would like to express our deepest appreciation to all those who provided us the possibility to complete this report. A special gratitude we give to our final year project supervisor, Mr. MUHAMAD ZAIRIL BIN MOHD NOOR whose contribution in stimulating suggestions and encouragement helped us to coordinate our project especially in writing this report.

Furthermore we would also like to acknowledge with much appreciation the crucial role of the staff of UiTM Pasir Gudang, who gave the permission to use all required equipment and the necessary material to complete the task “Home Security System”. A special thanks goes to our friends who help us to assemble the parts and gave suggestion about the task “Home Security System”. We have to appreciate the guidance given by other supervisor as well as the panels especially in our project presentation that has improved our presentation skills thanks to their comment and advices.

ABSTRACT

This is a digital home security system which can monitor motion sensor, magnetic switch (windows & doors). The goal of this project is to utilize the after-market parts and build an integrated home security system. This system also has alarm. Hence the security system will sound an alert when there is an attempt of break-in.

Furthermore this will be the lowest cost security system within all security system that already exists. So that all place that needs to be secure have our security system. The place had installed the system will in good condition and secure.
