## ACKNOWLEDGEMENT

Assalamualaikum...

In The Name of Allah the Most Gracious and Most Merciful.

Firstly, I would like to thanks to Allah because with bless, finally I finish myassignment due on time. I also would like to express my highest gratitude to all those who have given the assistance and cooperation in many forms whether it is in terms of physically or technically to completion of this report successfully.

I would like to thanks especially dedicated to my supervisor is Dr. Sr. Mohamad Ridzuan Yahya for the lesson that his given to me how to manage and to settle down Final Report (BSB 351). I also thanks to main office of Jabatan Kerja Raya that give me this great opportunity to carry out practical training in JKR Jajahan Pasir Puteh. Thanks to Mr. Mohd Eikmal bin Ahmad as a supervisor of Building Engineer in Jabatan Kerja Raya (JKR) Jajahan Pasir Puteh that give instruct during practical training period by guiding me in managing projects. I also would like to express my appreciation for helping and giving me input on my report. Thank you to Mr. Nik Yusoff who is the site supervisor of my practical project, bridge of Kampung Wakaf Bunut, Laluan Persekutuan 3, Pasir Puteh, Kelantan is teach me about process construction of bridge along my practical training, and all staff of that give cooperation to me.

Last but not least, my special appreciation goes to my beloved parents Ab. Rhaman bin Awang and Rosidah binti Ismail for their endless supports on moral support and encouragement. Also for the other members from another institution which are have given full of cooperation, thank you for the commitment. Thank you a lot of you.

## **ABSTRACT**

I have chosen a company for practical training is JKR Pasir Puteh, Pasir Puteh, Kelantan. Many projects have been made possible by JKR Pasir Puteh. During the practical training I have chosen the title of the piling works which JKR Pasir Puteh perform the work for the bridge in Kampung Wakaf Bunut Laluan Persekutuan 3, Pasir Puteh, Kelantan.

The research of the project is to know how the process of piling work for bridge construction. Construction is very important to make sure the deep foundation of the bridge must be in strong and safe use by consumers. Before the process of work, designers and engineers must be involved to determine the appropriate conditions including type piles and how many bars of piles should be used or suitable for bridges to be built in Wakaf Bunut Kampaung Laluan Persekutuan 3, Pasir Puteh, Kelantan.
