ACKNOWLEDGEMENT

Assalamualaikum,

I would like to express my deepest appreciation to all those who provided me the possibility to complete this report. A special gratitude I give to our supervisors, Sr. Dr. Nur Azfahani Ahmad, whose contribution in stimulating suggestions and encouragement, helped me to coordinate my tasks especially in writing this report.

Furthermore I would also like to acknowledge with much appreciation the crucial role of the staff of Hotel Perdana Kota Bharu, who gave the permission to use all required equipment and the necessary materials to complete the task "Building Defect in Hotel Perdana". Besides that, also thanks to parents for their support in term of financial and advice.

After that, i would like to thanks to all our group practical students especially because they are willing share the knowledge and give opinion to solve a certain problem. At the same time, I would like to say thank to Mr Arif Johari the executive building maintenance and all the maintenance staff of Hotel Perdana, Kota Bharu for cooperation and their kindness to share the information about this building. I'm also feel thanks to all the people for their help directly and indirectly to complete our assignment.

Thank you. May Allah SWT Bless us.

ABSTRACT

This report focuses on the building structure defects in Hotel Perdana Kota Bharu buildings. There are several building defects commonly found in Hotel Perdana buildings. In fact, building defects are becoming ordinary phenomena in the construction industry which results in negative impacts on hotels, in the means of building performance, health and safety aspects. Thus, a study is planned to identify the common building defects faced by hotel perdana buildings in Kelantan, Malaysia. Then, a thorough inspection is conducted and the respective defects are recorded with the aid of photographic. Besides, This report is divided into a few chapter which is company background, literature review, case study and conclusion & recommendation. In addition, the causes and remedial work of defect also been discussed in this report.
