ACKNOWLEDGEMENT

Assalamualaikum w.b.t.

First of all, thank to Allah S.W.T for His blessed to give me strength and patience during finishing this report process as required be my department. Department of Building Surveying, Universiti Teknologi Mara (UITM) in order to complete my final semester of diploma.

Here, I would like to take this opportunity to express my gratitude and deep regard to supervisor lecturer, Sr Nor Amin Bin Mohd Razduan for her exemplary guidance, monitoring and constant encouragement throughout the course of this report. The blessing help and guidance given by her time to time shall carry us a long way in journey of life which I about to embark

I also would like to express a lot of appreciation for Mr Yap Cheng Hong. The project director of Pembinaan Mitrajaya Sbd. Bhd. (PMJSB) for giving me chance for gaining knowledge as practical student in this company. Also an infinite thanks to Puan Sarimah Binti Din, the QA / QC Manager who give a lot guidance and experience along 4 months in this company. Not to forget, thanks to all the staff PMJSB for the commitment, encouragement and helping me throughout my practical period.

Last but not least, I would like to thanks to my parent for encouraging me doing this report and their support for financial issues. Our thanks and appreciation also to classmates for helping developing the report. I have taken great effort in this project. However, it would not have been possible without the kind support and help of many individuals and organizations. Thank You.

ABSTRACT

The objective of the final project is to apply the content that given whether by lecture or what on book in physical during practical, it help the student to learn from experience. Expose student in construction industries also one of the objective of final project, the student will know direction and more about scope of work as building surveyor. Student also, be able to analysis the problem that occurs during their training / practical and able to give the suitable recommendation.

Apart from that, student need to do research in their selected building. Student are need to use uniform building By Law (UBBL) 1984, as one of the reference.

The various data collection method to be use in order to complete this final project by doing training / practical. The student can see site environment themselves to do observation and gain new experience. Student also can into parties involved on construction site or personal charge in order to gain knowledge. Besides student also can do some research by surfing the internet to find general information. The student also can make book as one of the reference.

Lastly, the finding about this final project, is that student was able to gain some experience about construction operation whether in pre-construction, construction work, or post construction and also the new method that had been use never been before. The student also will able to manage to manage time accurately.
