INTEGRATED FINAL PROJECT (BSR330)

I am hereby pronounced this
Integrated Final Project Report is fully recommended for revision purpose
as the originality and its prospect is being accredited by the departments
through my supervision.

Supervised by:

Sr. Mohd Nurfaizal Baharuddin (*MRISM*)

.....
(July 2018)

ACKNOWLEDGEMENT

Bismillahirrahmanirrahim. Alhamdulillah, with the Izin of Allah SWT, our group has successfully accomplish the BSR 330 Integrated Final Project.

Firstly, special thanks to our dedicated subject lecturer and also our supervisor, Sr Mohd Nurfaizal Baharuddin, who is the program coordinator for BSR 330 Integrated Final Project and has given the valuable guidance for us during the preparation of the report and the slide presentation for the Integrated Final Project. The given knowledge and guidance of preparing the report is such a valuable experience for us.

Not to be forgotten, special gratitude to the assistant engineer, Mr. Nurhadi Khamil Rusli, at the Laman Perbadanan Kemajuan Negeri Selangor (PKNS) and the other maintenance and management team for the best cooperation, guide and help our group by providing the valuable information for the building maintenance implementation at the Laman Perbadanan Kemajuan Negeri Selangor (PKNS).

In addition, to the unforgotten teammates, deep sense of gratitude for the precious cooperation and help during the preparation and completion of the report and presentation. The project would remain incomplete without the great understanding each of the group member while completing the challenging task.

Nevertheless, thank you to the direct and indirect involvement of other classmates who has also provide the help and keep giving the necessary information for the completion of the report.

ABSTRACT

Integrated Final Project (IFP) is the most important report that should be prepared by the final year Student of AP 119 Program. The report of the final project require the group member to study and analyze the maintenance organization and management at their selected case study. The group shall then relate the collected data with their knowledge in how to build a well maintenance organization. At the end of this study, the students shall be able to identify the strength and weakness of the organization that emphasis to the property maintenance management.

The objectives of the Integrated Final Project (IFP) are generally to deliver the comprehensive understanding on the importance of the property maintenance management. Besides, it also require the student to learn and analyze through the collected data of the multi-disciplinary approach in maintenance. In addition, the Integrated Final Project also require the students to be able to prepare a scientific technical report of the maintenance at their selected case study. Lastly, it also require the students to be able to communicate, work in team, cooperate and confidently present the report to the panel.

For our group, the selected case study for the Integrated Final Project is the Laman Perbadanan Kemajuan Negeri Selangor (PKNS) which are located at Seksyen 14 Shah Alam. The method that has been implement by our group to gain the building information are generally through 3 basic phase. The first phase is by select the case study, then provide the Official Letter from UiTM to prove the student identification and also the cover letter from the student which to inform the intention and make the proper appointment with building owner through phone call and email. When we has gain the approval, the second phase is by doing the site visit, gather all the needed data and information and make the data and information analysis.

The last phase is by preparing and completing the report by following the guidance provided. At the third phase, our group will have to go through the critique session with the subject supervisor, who responsible to supervise the report to ensure that we are on the right track and with the right format while accomplishing the report.

The Integrated Final Project report is then will be submitted to the Program Coordinator for final submission and the student will do the presentation of their report in front of the panel.
