ACKNOWLEDGEMENT

I would like to thank Associate Lecturer En Irwan Bin Mohamed Ali of the Faculty of Building Surveying, Universiti Teknologi MARA who has reviewed and given commitments, comprehensive and generous advice towards accomplishment of this practical report. Great thank to En Samsuria bin Kamisan my supervisor and all the staff who contribute a lot in this internship training. After the practical training has been completed, I gained a lot of knowledge and experience in the Jabatan Kerja Raya Segamat during the site visit. This is because I have a lot of things about the work of project monitoring are studied. For me, I was very fortunate to have the opportunity to do a site visit. So I can get a lot of experience.

During my practical training can also make use of what I learned when I was at UiTM. Reviewing, editing and drawing current project using AutoCAD. It was a lot of work that I like the installation of formwork, binding iron, and etc.. works test cube I also learned during testing on the cube. In addition, the survey again after the completion of the work that has been done by the contractor. work measurement and monitoring is essential to ensure that contractors do the work as in the tender. Also I thank the JKR for helping me to monitor the work carried out by contractors. lots of useful practices in public works department (PWD).

I also thanks to both of my parents and family for supporting me during my practical training at this company. Otherwise, it is quite impossible for me to accomplish my report.

ABSTRACT

This project report is to present the monitoring process for building a store / warehouse for parking goods castle "shooting box" according to the specification of Jabatan Kerja Raya (JKR) Segamat. project monitoring work carried out by contractors working in accordance with the tender specifications and the official ruler.

For this report, it will include the monitoring process on choosing the best contractor base on their requirements the lowest price. The contractor also should include the entire required certificate. This report is based on my experience during practical training when visited the site. Most information is gathered from all personnel that involved inside construction and at the headquarters.
