STUDENT NAME : ATFAN BIN ISHAK  
UiTM I/C NUMBER : 2001467371  
DISSERTATION TOPIC : THE EFFECTIVENESS OF AIR  
CONDITIONING SYSTEM AT THE UiTM MAIN  
CAMPUS SHAH ALAM  
SESSION : MAY 2003  
SUPERVISOR NAME : EN. MAHAYUDDIN MAHMOOD  
SIGNATURE :   
DATE : 11/08/03

## TABLE OF CONTENT

Item	Page
Topic	i
List of Illustrations	iv
List of Table	v
Acknowledgement	vi
1.0 GENERAL INTRODUCTION	1
1.1 The Issues	2
1.2 Hypothesis	2
1.3 Objectives of the Research	3
1.4 Scope of Research	4
1.5 Research Methodology	5
1.6 The Sequence of Table of Contents	6
2.0 AIR CONDITIONING SYSTEM	8
2.1 The Definition of Air Conditioning	9
2.2 The Needs of Air Conditioning	10
2.3 The Advantages and the Disadvantages	12
2.4 Air Refrigeration: Heat Transfers Cycles	13
2.5 Basic Operations	19
2.6 Mechanical Ventilation	24
2.7 Basic Element on Air Conditioning System	25
2.8 The Basic Typical Idea	30
2.9 Types of Air Conditioning Systems	31

## Acknowledgement

ASSALAMUALAIKUM W.B.T

I would like to acknowledge and express our highest gratitude to all those who had contributed in completing this report. Especially dedicated to:

- En. Mesran b. Sulaiman  
Technician Assistant Building Maintenance Unit UiTM
- Pn. Rasan Halipah Yusoff  
Draftsman

I would like to give my deepest thank to my parents, family and other love ones for the support, motivate and encouragement to me for this dissertation.

Next I like to show my appreciation to my supervisor, En. Mahayudin Mahmood for giving me an idea and a lot of information and guideline. Also not forgotten to the entire lecturer in Building Survey Department.

Not to forget the deepest appreciation to all my friends those help me some in this dissertation. Lastly but not least, thank you for your help.

May Allah bless all of you for your willingness and kindness.

## 1.0 GENERAL INTRODUCTION

The development of building industry in Malaysia now is very marvelous. Malaysia now is towards a developed country. Thus the conversion of economic from agriculture to industry and now towards to multimedia country, there are so many changes and chances of job in our country. People need better way of life, works, and environment. There are so many works to do to achieve the title of developed country. They need building to work in with excellent environment especially good air condition.

One of the methods of achieving good environment is to provide good ventilation within the building. However, this could not be provided in all building, thus a mechanical type an air-conditioning system is required. But recently there were some complaints from the occupants on the problems, in this case, I'm very much interested to find out the problem that may arise and its solution in order to maintain at least to maintain Indoor Air Quality for the occupants
