ABSTRACT

The final project for the student of Diploma in Interior Design is a manifestation towards the student's knowledge about the whole aspect on interior design that had been learnt from basic to the final presentation on the proposed design. The project that had been chosen for the final project is to propose upgrading works of Muzium Telekom for Telekom Malaysia (TM) at Jalan Raja Chulan 50200, Kuala Lumpur. This upgrading works of museum is to create a new interior and create a modern design for gallery , at the same time to create a new interactive gallery with help of the lighting, audio and visual. In other hand to rearrangement to smoothen the flow. The concept must represent the client itself. The interactive design Muzium Telekom is based on High-technology concept. This is to full fill the client's needs as they want introduce their high-speed broadband in this museum. Before getting a desired design that is suitable with the client's needs, some data analysis should be done where these analyses is on types of museum, types of interactive showcase, museum planning and exhibiton design. Some of the gained information of the study is through interviews, printed media, internet, observation, and through the result from the case study either locally or internationally.

ACKNOWLEGMENT

First of all, I would like to thank to the Merciful god Allah SWT because He gave me the strength to complete this Project Research Report.
