## ACKNOWLEDGEMENT

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Alhamdulillah, thanks to Allah with his blessing we be able to complete this final year project at last. To complete this project, there a lot of obstacles and problem that occurs that leads to a lot of frustration that we gone through as well as joy that we had in the quest to complete this project.

The most special thanks most importantly to our supervisor, Encik Ahmad Shahrin Bin Ibrahim which is the lectures and the guidance for us to complete this project in the right way to make sure this project will come true. He is an open minded person that we can share our entire problem with him. In other words, we owed him so much in the mission to complete this project.

Last but not least, we would to dedicate our thanks to our beloved parents and all of our family that also gives big contributes to us to finish this project. They had given us a moral support and as well as the money to help us to accomplish this final year project. Other than that, mostly we also would like to say thank you to our group members for gives full commitment and dedication to complete this project.

## ABSTRACT

SMS Door Security is typically built to avoid any burglary from happening to your house with high security door type. With these device existents, it will become the informer and the first level safety to the house. In other words, it will reduce the chance of our house from being robbed. Furthermore SMS system using GSM will send the information to the house owner and nearby police station if there are any trials to breaking the house.

It is also equip with the alarm to trigger if there are any intruder. This is to make sure the neighbor know if there any break-in the house. Other than that, with the use of keypad, the house owner doesn't need to worry about the house key. They can leave their house with a relief. Maybe our creation not exactly safe, this is the other initiative to make our house safer than usual.
