ABSTRACT

The final project must be done by final year students of the internal architecture are to determine the level of knowledge acquired during staying in Uitm. At the end of study students must propose one project of interest and the selected projects must be in accordance with the current situation to ease in making designs. The project has been proposed for the final project is to upgrade the Fire and Rescue Gallery at Bukit Jelutong. Clients for this project are the Department of Fire and Rescue Bukit Jelutong. Gallery parties cooperate by providing copies of building drawings. The knowledge and skills are required along the process of design works which include research, case study, interviewing, designing a proposal, submission by stages, create session, preparing art work, preparing presentation drawings, design development and final presentation. The research will involved research methodology such as interview, observation, Internet and side references conduct on the products and manipulative the gallery will be gathered with others related information and details which work as guideline to prepare this project. From various studies that have been done, we can identified who the target market for the gallery. Observations show the target market for this gallery is a child because they provide courses for children who are in school. Furthermore insurance sales representatives being one of the target market for this gallery because they want to obtain information about fires associated with their insurance. Project selection is done based on the interests of the Fire and Rescue and also incidentally they want to make changes to their gallery so that its make it easy to their give some cooperates on giving information.

ACKNOWLEDGEMENT

Assalamualaikum w.b.t, praise to The Almighty Allah S.W.T because of His blessing and willing, I have succeed to complete my Final Project Report on Proposed Upgrading of Fire and Rescue Gallery at No 3, Persiaran Tebar Layar, Bukit Jelutong Section U8 Shah Alam Selangor as one of the requirements to get a scroll in Diploma of Interior Design Department, UiTM Perak, Seri Iskandar Campus.

CHAPTER 1.0

INTRODUCTION

1.1 INTRODUCTION

Project Report is a one of the requirements for Final Year Student to obtain their Diploma in Interior architecture. Every student have to submit their project report consist of information about the final project in subject interior architecture (interior design). The project report should have all information about the project done from briefing until the end result of the project such as project and site proposal, case study, concept, style, image, design development and final presentation. Interior design course help student to inspire their self to be a designer and to trained their mine on creativity and create an ideas to express in the real life.

Here are expressions of ideas on upgrading Fire and Rescue gallery at no 3, Persiaran Tebar Layar, Section U8 Shah Alam. The project proposal for Jabatan Bomba dan Penyelamat Bukit Jelutong it's a about upgrading their gallery from uninteresting gallery to attractive gallery. The existing space also are not practical to be a gallery because their have a lots of thing to display but the gallery to small consist of 3200sq. Their have a lot of thing to display but the space are not enough because this department provided only a minimum space for the gallery. The arrangements of required space come without a good story board and weak of traffic flow. The arrangements of type of display only focus on wall mounted display and lots of info its on writing and picture.
