ACKNOWLEDGEMENT

Assalamualaikum w.b.t

“In the name of ALLAH, the most Gracious and most Merciful”

First and foremost, I thanked ALLAH the All Mighty for I am blessed to complete this project in time. Special thanks to Mdm Zolidah Kasiran, my very helpful, supportive and dedicated supervisor for all his supervision, comments, ideas, suggestions and guidelines given to me in order to complete this project. My special thanks go to En Adzhar Abdul Kadir for the explanation and guidelines given to me especially during the preparation period and also during the presentation of this project. His contributions in this project have been very helpful towards completing this project paper. To my beloved family, a million thank you to them for their moral and financial support. Especially my mom and dad, you mean the world to me. Thanks for the love, encouragement, supports and prayers. Last but not least, my fellow friends and others who have contributed directly and indirectly towards the completion of this research. Thank you. Wassalam.

ABSTRACT

A conferences objective is to give an opportunity to authors to present their papers. The conferences have their own committee members to organize and advertise it. However to reduce the time consuming, online system would be the best solution. For those who are not IT savvy we provide this web based conference management system to help them. This Conference Management System consist website templates and various item needed such as date, theme and payment regarding the conference that going to be held. This web based conference management system will give the committee who have the authority to apply conference websites template using this system. This system offer few layouts of conference websites where the user will have opportunity to decide or choose the best layout that suit the conference theme. This system also support for conference website template, where difference conference can use different website design based on the user requirement in order to meet the conference theme and objectives. This system is preferable on making a design template website. This system will use PHP as platform in order to develop this system.
