**Information Management System for Disable
Availability System using RFID (DAS)**

Siti Khadijah Kamaruddin

**Thesis submitted in fulfillment of the requirements for Bachelor of
Science (Hons) Data Communication and Networking Faculty of
Computer and Mathematical Sciences**

July 2013

ACKNOWLEDGEMENT

Alhamdulillah, praise and thank to Allah because of His Almighty and His utmost blessing, I was able to finish this research within the time duration given. Firstly, my special thanks go to my supervisor, Puan Shapina Haji Abdullah.

Special appreciation also goes to my beloved parents, Mr. Kamaruddin Mamat and Mrs. Rosilah Abdul Wahab.

Last but not least, I would like to give my gratitude to my dearest friend and also my team member, Ain Afifi Abdul Kadir for giving a full commitment to this project.

Thank You, may Allah s.w.t bless all of you.

ABSTRACT

A school management without proper method in storing students' information leads to many problems. Using a manual process, more papers are used, increased the cost as well as a loss of information at any time. An Information Management System is provided to keep the students' information in a database efficiently. Here, teachers can store and retrieve the information easily. The Disable Availability System using RFID (DAS) consists of two major systems, the Attendance System and Information Management System. This project is concentrated on Information Management System using Agile method. The Information Management System is built using Visual Basic programming language and SQL database. Hopefully, this system will lessen the problems faced by teachers to store the information efficiently.

CONTENTS	PAGE
SUPERVISOR'S APPROVAL	ii
DECLARATION	iii
ACKNOWLEDGEMENT	iv
ABSTRACT	v
TABLE OF CONTENTS	vi
LIST OF FIGURES	x
LIST OF TABLES	xii
LIST OF ABBREVIATIONS	xiii
CHAPTER ONE: INTRODUCTION	
1.1 Background of Study	1
1.2 Problem Statement	1
1.3 Objectives	2
1.4 Project Scope	2
1.5 Research Significance	3
1.6 Outline of the Thesis	3

CHAPTER TWO: LITERATURE REVIEW

LITERATURE REVIEW	PAGE
2.1 Technology	
2.1.1 Web Design History	4
2.1.2 The Evolution of Visual Basic Programming Language	7
2.1.3 Microsoft SQL Server Development	9
2.2 Related Works	
2.2.1 Automation of Attendance System using RFID, Biometrics, GSM Modem with .Net Framework	11
2.2.2 Radio Frequency Identification (RFID) Based Attendance System with Automatic Door Unit	12
2.2.3 Web-based Student Attendance System using RFID Technology	13
2.2.4 An Adaptation of the Web-based System Architecture in the Development of the Online Attendance System	14
2.2.5 Mobile Ubiquitous Attendance Monitoring System using Wireless Sensor Networks	16
2.2.6 Design and Implementation of the Work Attendance Management System for Bus Company	17
2.2.7 Registration System	18
2.2.8 Development of Attendance System using Biometric Fingerprint Identification	18
2.2.9 Student Attendance System Based On Fingerprint Recognition and One-to-Many Matching	20
