## AUTHOR'S DECLARATION

I declare that the work in this IT Project was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the results of my own work, unless otherwise indicated or acknowledged as reference work. This IT Project has not been submitted to any other academic institution or non-academic institution for any degree or qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for Post Graduate, Universiti Teknologi MARA, regulating the conduct of my study and research.

Name of Student : I.D Safairis Bin Amat Noor  
Student I.D. No. : 2013150711  
Programme : Master of Science in Information Technology  
Faculty : Computer and Mathematical Sciences  
IT Project Title : Problematic Internet Use Relationship with Personality Traits

Signature of Student :  .....

Date : 26 January 2016

## ABSTRACT

Internet has become an integral part of our daily life. Since the existence of Internet, it does not only help us to communicate with each other, but also has become one of the main source of obtaining information, connecting between electronic devices and applications, provides entertainment, increasing work productivity and many other necessary purposes. Despite the Internet being beneficial to our daily life it also comes with side effects. As our culture becomes increasingly dependent on such technologies, it is not surprising that some individuals demonstrate problematic Internet use. Ease of access to Internet provides an escape route to dysfunctional behaviors and maladaptive cognitions where compensation theory suggests that psychological and/or social problems in a person's life can lead to excessive Internet use; as these individual experience problems in their daily lives, they use the Internet as a way to compensate for their problems. This aspect of personality related characteristics, often examined by Five Factor Model (FFM) is commonly used and accepted as a comprehensive representation of personality traits. This study aimed to investigate the existence of problematic Internet use and the relationship with personality traits among working adults at the workplace. An ICT organization in Malaysia was selected as target respondent where Internet can be easily accessible through personal device and employer-provided assets. This research discussed on various studies conducted against problematic Internet use, and the relation with personality trait factors, using descriptive and statistical analysis method. Questionnaires was converted into webpage and conducted on 104 sample of respondents in an ICT organization. The results obtained using structural equation modelling indicated that there was a significant relationship between the constructs of three factors of problematic Internet use such as neglect, obsession and control disorder and four factors of personality traits such as agreeableness, conscientiousness, openness and emotional stability except extraversion factor. Implications of the current findings as well as limitations and future directions are discussed.

## ACKNOWLEDGEMENT

Firstly, I would like to express my great gratitude to the almighty creator for allowing me to complete this research. Sincere gratitude to my supervisor Dr. Jasber Kaur a/p Gian Singh for the continuous support, her patience, motivation, and immense knowledge. Her guidance helped me in all the time of research and writing of this project. I could not have imagined having a better advisor and mentor for my study.

Besides my supervisor, I would like to thank the rest of my Master's Degree lecturers who have taught me for their insightful comments and encouragement. I thank my fellow lecture mates in for the stimulating discussions, for the sleepless nights and joyful activities we were working together before deadlines, and for all the fun we have had in the last four semesters.

Last but not the least, I would like to thank my family, especially my wife for being always by my side, my kids for giving me motivation, parents and to my brothers and sister for supporting me spiritually throughout writing this project and my life in general.
