ABSTRACT

This study identifies the unethical acts done by the employees of National Film Development Corporation Malaysia (FINAS) in their computer usage. One hundred and thirty employees were asked to evaluate on adherence of computer ethics. A comparison between professional and supportive staff was done to determine the level of computer ethics compliances of computer use. Research for differences was performed across five distinct groups: job designation, age, gender, and. type of school and academic qualification. The results of the tests conducted indicate that the ethical awareness of computer use of the employees in certain situations. There were minimal differences across gender and job designation. This suggests that computer ethics awareness training is needed for FINAS employees.

CANDIDATE'S DECLARATION

I declare that the work in this independent study was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the result of my own work, unless otherwise indicated or acknowledged as referenced work. This topic has not been submitted to any other academic institution or non-academic institution for any other degree or qualification.

In the event that my thesis be found to violate the conditions mentioned above, I voluntarily waive the right of conferment of my degree and agree be subjected to the disciplinary rules and regulations of Universiti Teknologi MARA.
