**Local Element Based Game Environment
Development**

MUHAMMAD ZULFADHLI BIN ROSLI

Thesis submitted in fulfilment of the requirements for the
Bachelor of Computer Science (Hons) (Multimedia Computing)
Faculty of Computer and Mathematical Sciences

JANUARY 2012

ACKNOWLEDGEMENT

Alhamdulillah, with a god willingness this project was succesfuUy completed. With that, I would like to take this opportunity to express my gratitude to everyone who has helped and contributed in preparing this project doesn't matter that it is either directly or indirectly.

Firstly, I would like to thank to my both parent that is '.

that had raise me from born until now. They had spent so much time and money in order to give me education until now.

Secondly, The most important person that I would like to thank to my supervisor Dr Fakhru Hazman Yusoff that help me in completing this project. He gave so much guide and information lhat I could not get from other lecturer. Without his idea and opinion I think I'm not even can do this project but I also can't even find my topic for my final year project. AH of things that he taught will be remained in memory and all of his kindness will never be forget.

Besides that, I also would like to thank to Mr. Mohd Yunus Mohd Yusof that always give us tips, guides, explanations and many more in the class. Without him, who am I to complete this project.

Lastly, I would like to thanks to all of my friends especially Shiela that help me to finish this project. Thanks guys for all of your co-operative, kindness, knowledge and many more. Without you guys, I think I'm also cannot completed this project.

TABLE OF CONTENTS

1.0 Chapter 1 - Introduction	1
1.1 Project Background	1
1.2 Problem Statement	1
1.3 Project Objective	2
1.4 Project Scope	2
1.5 Project Significant	2
2.0 Chapter 2 - Literature Review	3
2.1 Overview of Mobile Devices	3
2.2 Overview of Mobile Gaming	6
2.3 Overview of Android and Java Programming Language	10
2.3.1 What is Android	10
2.3.2 Features of Android	10
2.3.3 Android Java Libraries and RunTime	11
2.4 Overview of App Inventor	13
3.0 Chapter 3 - Methodology	16
3.1 Introduction	16
3.2 Research Framework	16
3.2.1 Project Planning	18
3.2.2 System Analysis	18
3.2.3 System Design	18
3.2.4 Implementation	22
3.2.5 Testing	23

3.2.6 Maintenance	23
4.0 Chapter 4 - Design and Implementation	24
4.1 Introduction	24
4.2 Conceptional Design	24
4.3 Design and Development Flow Diagram	26
4.4 Interface Design using App Inventor Viewer	26
4.5 Creating Behavior using App Inventor Block Editor	34
4.5.1 Link Behavior	35
4.5.2 Touch Behavior	36
4.5.3 Colliding Behavior	37
4.5.4 Change Sprite Image Behavior	38
4.5.5 Time Countdown Behavior	39
4.5.6 End Game Behavior	40
4.5.7 All Finished Behavior	41
5.0 Chapter 5 - Testing and Implementation	43
5.1 Testing	43
5.1.1 Payability Question	43
5.1.2 Platform Question	45
5.1.3 Local Element Question	46
5.1.4 Touch Screen Question	48
5.1.5 Aesthetics Question	49
5.1.6 Conclusion of Result	50
5.2 Maintenance	51
6.0 Chapter 6 - Result and Conclusion	52
6.1 Result	52

ABSTRACT

The percent of user of playing mobile games is increase from days to days and there was so many type of games that had been published in the market. Some of the developer in Malaysia just develop games base on game design the target market without thinking that something must be change in order to make our local environment based also not *to* be forget. *In* the market have *so many types* of application and games but our local Malaysian content in the mobile or games application is still lack ing and left behind. This paper does research on what must be done to design a good mobile games to user while having local Malaysian content in the application. In order to complete this research, SDLC model will be used.
