Universiti Teknologi MARA

Developing an Online Community for UiTM UFM using Web 2.0 Standards

Mohd. Yunos bin Mazlan

Thesis submitted in fulfillment of the requirements for
Bachelor of Science (Hons) Information System Engineering
Faculty of Information Technology And Quantitative Science

December 2007

ACKNOWLEDGEMENT

The making of this thesis has been a long venture that was thoroughly exhausting yet always absorbing. This thesis would not have been possible without the kind cooperation and generous assistance of a great many people. My warmest thanks and acknowledgement goes to the following.

My thanks to God who has given me the guidance and vision at all stages and into, continuing providing me with all the strength when my energies were flagging.

Most significantly, I take great pleasure in thanking my parents for their endless support, encouragement and patient throughout my study in UiTM.

Also I would like to thank all my colleagues and the members of staff of Faculty of Information Technology and Quantitative Science, UiTM Shah Alam, for their support and assistance. In particular, my thanks to En. Saharbudin Nairn Tahir Shah for his guidance and endless effort in supervising this thesis throughout the course.

I am particularly grateful and wish to express my appreciation and acknowledge the professional support given by En. Maryani Sandi, Technical assistant for UFM radio and all the workforce behind the UFM radio team.

ABSTRACT

The rapid growth of the Internet has provide many opportunities for students to improve their learning medium and environment. One of the way is to participate in online communities on the Internet, and share experience or knowledge among the members of the community. This can give them a glimpse of what is happening in the real world and make friends. Internet technology is evolving rapidly by days be it software or hardware. Technology launched today, may become obsolete in merely two months. The technology transition of Web 1.0 to Web 2.0 brings a lot more changes and advancement. Web 2.0 offers users rich experience, more stability and faster response. By combining both online community and Web 2.0 element, the research is about developing an online community for UFM using Web 2.0 standards. The research also includes recommendation on how the UFM online community can be an added value to UiTM.

CONTENT	PAGE
DECLARATION	i
APPROVAL	ii
ACKNOWLEDGEMENT	iii
ABSTRACT	iv
CHAPTER ONE INTRODUCTION	
1.1 Introduction	1
1.2 Background	2
1.3 Problem Statement	2
1.4 Research Objective	3
1.5 Research Scope	3
1.6 Significance of Research	3
1.7 Organization of Chapters	4
CHAPTER TWO : LITERATURE REVIEW	
2.1 Introduction	5
2.2 Web-based community network-Geographical	6
2.3 Web-based community network-Interest	9
2.4 The Nature of Online communities Communication	19
2.5 The operation of online communities	11
2.6 Relationship in Online Communities	12
2.7 Online community rules of behavior	13
2.8 Online Forum	14

2.9 Web 2.0 15
2.10 Web 2.0 Principle Features 19
2.11 AJAX 21
2.12 UML 24

CHAPTER THREE : METHODOLOGY

3.1 Introduction 25
3.2 Research Methodology 26
3.2.1 Initial Study 27
3.2.2 Requirements Gathering 27
3.2.3 Data Analysis 29
3.2.4 Design 30
3.2.5 Development 31
3.3Summary of Interview 32
3.3.1 Authentication 32
3.3.2 Forum 33
3.3.3 Poll 33
3.3.4 Song Request 33
3.3.5 Web Radio 33
3.3.6 Announcement 34
3.3.7 Filtering 34
3.3.8 Banning 34
3.3.9 UiTM System 34
3.4 Summary of Web 2.0 Observation 36
3.4.1 Rounded shapes 37
3.4.2 Shades 37
3.4.3 Footers 38
3.4.4 Font Size 38
3.4.5 Buttons 38
3.4.6 Font Types 39
