**DEVELOPMENT OF A MOBILE WORKFORCE
SOLUTION FOR MAJLIS BANDARAYA
PETALING JAYA (MBPJ) BUILDING
DEPARTMENT USING RAPID APPLICATION
DEVELOPMENT (RAD)**

JAFIZATUL AZLINDA BT JAAFAR

Report submitted in partial fulfilment of the requirements
for the degree of

Master of Science (Information Technology)

Faculty of Computer and Mathematical Sciences

July 2014

ABSTRACT

This project shows how mobile communication and technology can be used on City Council domain. More specifically, the goal of this project is to design and develop a mobile workforce concept that gives field workers a better possibility to do the building inspection in real time, utilizing mobile devices such as mobile phones and tablets. At the beginning of this project, user study and information gathering was conducted at Majlis Bandaraya Petaling Jaya Building Department. According to the result of interview with both officer expert and field workers, a preliminary use case of the concept mobile workforce management was defined. This project is implemented using Rapid Application Development (RAD) methodology, with the usage of Mendix Business Modeler version 5.5.0. By using microflow in Mendix software the use case was continuously refined and rewritten and user interface was designed in from sketches to high-fidelity prototype. Finally a fully functional prototype which used as mobile workforce was implemented on iOS mobile platform and evaluated by both experts in MBPJ Building Department. The result on this project illustrates the current state of the art technologies on mobile device can be used in City Council to help field workers and architects with their daily work.

ACKNOWLEDGEMENT

First of all, I would to thank Allah S.W.T for His guidance and blessing in completing my Master Degree research for this semester. Without His blessings and consent, I might not have enough courage and determination to complete this research. All my thanks and appreciation will be lay upon Him.

Secondly, to my beloved family especially my husband En. Khairulazlan Hj Rahmat, your sacrifices were way beyond amazing and also to my parents for their endless love, prayer, encouragement and support throughout the production of this report. To those who indirectly contributed in this research, your kindness means a lot to me. May Allah S.W.T bestow them with all of His consents in the world and hereafter.

Finally, I would like to show my biggest gratitude to my supervisor, En. Mohamad Norzamani Sahroni, for his great supervision and constant support. His invaluable help with constructive comments and suggestions have contributed to the success of this research. Thank you very much.

Jafizatul Azlinda Jaafar

TABLE OF CONTENTS

	Page
STUDENT'S DECLARATION	i
ABSTRACT	ii
ACKNOWLEDGEMENT	iii
TABLE CONTENTS	iv
LIST OF TABLES	viii
LIST OF FIGURES	ix

CHAPTER 1: INTRODUCTION

1.1	Research Background	1
1.2	Problem Statement	2
1.3	Research Objective	3
1.4	Research Questions	4
1.5	Significant Of The Research	4
1.6	Scope And Limitation Of Research	5
1.7	Report Outline	5

CHAPTER 2: LITERATURE REVIEW

2.1	Introduction	6
2.2	Mobile Workforce	6
2.3	Mobile Worker	7
2.4	Mobile Workforce Management Solution	8
2.5	The Development Of Mobile Workforce Management System (MWMS)	8
2.6	Benefit Of Mobile Workforce	10
2.7	Challenges In Adoption Mobile Workforce Solution	10
2.8	Business Engineering With Mobile Workforce Solution	11
2.9	Lean Methodology	15
	2.9.1 Lean Practices	18
	2.9.2 Lean Process Improvement In Building Inspection	19
2.10	Software Development Methodologies	20

2.11	Rapid Application Development (RAD)	21
2.12	RAD Tools	23
2.13	A Characteristic RAD Tools	25
2.13.1	Mendix	26
2.13.2	Wavemaker	27
2.14	Comparison – Traditional Programming Vs. RAD Tool Language	30
2.15	Benefit RAD Tools	31
2.16	Why Mendix	32
2.17	Implement Mobile Apps with Mendix	32
2.18	Summary	34

CHAPTER 3: RESEARCH METHODOLOGY

3.1	Rapid Application Development (RAD)	35
3.2	Phases Of Rapid Application Development	36
3.2.1	Requirements Planning Phase	36
3.2.2	User Design Phase	36
3.2.3	Construction Phase	36
3.2.4	Cutover Phase	43
3.3	Hardware and Software	45

CHAPTER 4: ANALYSIS AND FINDINGS

4.1	Introduction	47
4.2	Requirements Analysis : interviews	47
4.3	Requirements Analysis : Observation on site	50
4.3.1	How a work order is handled	50
4.3.2	Building Inspection Process	51
4.4	Problems and Findings	53
4.4.1	Lean process Improvements	56
4.5	Discussion	56
4.5.1	Processes carried out at a central location/office	57
4.6	Result from user study	59
4.7	User Design Phase	59
