## ABSTRACT

In the past few decades, students' assessment has been practiced in teaching and learning environment. Students know their achievement level via assessment. Meanwhile, it notifies educators about the achievement of the preferred goal in learning. As the technology changes, there is a need to have an assessment tool to ease the educators in evaluating the students. The issues rise on how to improve efficiency, streamline the administrative processes, and support the student's learning styles by using technology in assessment process. Currently, assessment process is very time - consuming, costly and stressful for student and staff. The importance of standard assessment for universities to certify standardization in marking, student assessment is not being implemented using technology platforms and how to ensure effectiveness consistency in assessment is another problem faced by assessor in teaching and learning. The different types and methods of assessment that available in teaching and learning presented in this research are expected to help educators to discover the best practices of assessment and determine technology that can emerge in assessment. This research only covered for Masters in Information Technology (MSc. IT), Faculty of Computer & Mathematical Sciences, UiTM Shah Alam, full time course work in management track and technology track only that are considered as research scope. This research used interpretivist research paradigm. In this research, a qualitative approach was used by applying case study. This research relies on observation and internal documents. The proposed research design for this research had 3 phases involved which are planning and preliminary study; assessing and analysis and implementing phase. Findings indicated that formative is known as the appropriate type of assessment and embedded assessment as methods of assessment by applying course embedded assessment produced appropriate practices of assessment in teaching and learning. The technology can be support for assessment is rubric and responsive web design. In future, other researcher can extend this research for other assessment component in teaching and learning; identify the degree of lecturer's acceptance and factors that influence the acceptance of e – assessment system among lecturers in MSc. IT. The implementation of me – RUBRIC can be implemented to other faculties in Universiti Teknologi MARA (UiTM). Another recommendation is to make me – RUBRIC more flexible so lecturer is easier to make changes on their own rubrics. As for commercialize purposes, me – RUBRIC must be robust in order to change the content of the rubric and number of assessment. Hence, other faculty and universities can adopt and adapt me – RUBRIC for their assessment in teaching and learning.

## ACKNOWLEDGEMENT

*"All praises due to ALLAH S.W.T, Most Gracious and Most Merciful"*

First and foremost, I would like to be thankful to Allah S.W.T for all His blessings, courage, patience and strength that I had during completing my project. Thank you Allah I succeeded in finishing this project.

I would like to give special thanks and address my deepest and warmest appreciation to my supervisor, Puan Saidatul Rahah binti Hamidi for her assistance, guidance, constructive comments and continuous support thru the process of project until completed. Special thanks also to my Research Methodology lecturer, Assoc. Prof. Dr. Haryani binti Haron for the suggestion, ideas and criticism really help me a lot to finish this project on schedule.

To all my friends that have been helping me and supporting me throughout the entire duration of this semester, thank you for your kind-heartedness. Besides that, I also would like to express my appreciation to all who have directly and indirectly lead me throughout all the stages of completing this project.

Last but not least, millions of thank to all my dearest family members, especially my mom, my dad and my love for their great support, blessing, love, contribution and personal sacrifices are truly appreciated and will be remembered. Thank you again.

May ALLAH bless all of you. Wassalam.

<b>STUDENT'S DECLARATION</b>	<b>i</b>
<b>ABSTRACT</b>	<b>ii</b>
<b>ACKNOWLEDGEMENT</b>	<b>iii</b>
<b>TABLE OF CONTENTS</b>	<b>iv</b>
<b>LIST OF FIGURES</b>	<b>viii</b>
<b>LIST OF TABLES</b>	<b>x</b>
<b>CHAPTER 1: INTRODUCTION</b>	
1.1 Introduction	1
1.2 Research Background	1
1.3 Problem Statement	4
1.4 Research Question	6
1.5 Research Objectives	6
1.6 Research Scope	6
1.7 Research Significance	7
1.8 Report Outline	7
<b>CHAPTER 2: LITERATURE REVIEW</b>	
2.1 Introduction	9
2.2 Teaching and learning Assessment	9
2.3 Outcome Based Education (OBE)	14
2.4 Assessment	16
2.5 Type of Assessment	18
2.5.1 Formative	19
2.5.2 Summative	19
2.5.3 Adaptive	19
2.5.4 Diagnostic	20

2.5.5 Advantages and Disadvantages of the Assessment Types	20
2.6 Methods of Assessment	23
2.6.1 Portfolio	23
2.6.2 Embedded Assessment	24
2.6.3 Pre-Test and Post – Test	25
2.6.4 Advantages and Disadvantages of Assessment Method	25
2.7 Issue on assessment	28
2.7.1 Effective Teaching and earning	28
2.7.2 Technology	31
2.7.3 Time Consuming, Poorly Managed, Stressful, Expensive	31
2.8 e - Assessment	32
2.8.1 e – Assessment Advantages and Disadvantages	32
2.8.2 e- Assessment Method	33
2.8.3 The implementation of e - Assessment	33
2.9 Rubrics Definition	35
2.9.1 Advantages of Rubrics	35
2.9.2 Function of Rubrics	38
2.9.3 Effect of Rubrics Use on Academic Performance	38
2.9.4 Guideline for Developing Rubrics	39
2.9.5 Type and Structure of Rubrics	41
2.10 Summary	42

## **CHAPTER 3: METHODOLOGY**

3.1 Introduction	44
3.2 Research Assumption	44
3.3 Research Approach	45
3.4 Strategy of Inquiry	46
3.5 Research Design	47
3.5.1 Phase 1 – Requirements Planning	48
3.5.2 Phase 2 – User Design	50
3.5.3 Phase 3 – Construction	52
3.6 Summary	53
