**DIGITAL FORENSIC DATA COLLECTION IN
CLOUD COMPUTING USING LOGIC MODEL**

AIMAN INSYIRAH BINTI ALAM

Report submitted in partial fulfillment of the requirements

Master of Science (Information Technology)

Faculty of Computer Science and Mathematic

JULY 2014

ABSTRACT

Cloud computing is arguably one of the most discussed information today. It presents many promising technological and economical opportunities. However, there are quite a number of hiccups along the way where customers remain reluctant to move their business IT infrastructure completely to the cloud. One of the main concerns is cloud security and when threats are unknown. Cloud Forensics constitutes a new and troublesome issue for investigators. Due to the decentralized nature of data processing in the cloud, traditional approaches to evidence collection and recovery are no longer practical. The purpose of this study is to investigate existing data collection in computer forensics in a cloud computing environment focusing in a Software as a Service (SaaS) and Infrastructure as a Service (IaaS) environment and adopted a model for data collection in cloud computing forensics using logical model. This study involved three phases. The preliminary study allows an exploratory activity in understanding the security of cloud computing from digital forensics point of view. Next a logic model is adopted based on the input and understanding gathered on the preliminary study. Finally interviews with five IT Security-expertshave been conducted to evaluate the logic model that had been adopted. The study has adopted a logic model for data collection in SaaS and IaaS environment. The logic model consists of components such as inputs, activities, outputs and outcomes which provide clear explanation of each process. The adopted logic model is useful for researchers to develop digital forensics data collection tool which can be used in cloud computing environment.

ACKNOWLEDGEMENT

In completion of this project, all praise to Allah the Almighty for His love and strength to empower me to successfully conclude this study. My gratitude also goes to my supervisor, Puan Mudiana Mokhsin @ Misron for his precious guidance and encouragement during completion of my project. Without his continual support and advices, this thesis would have not been the same as presented here.

My heartiest gratitude and thanks goes to my family for their encouragement, unwavering love, prayer, patience and trust. My true undivided love to my beloved husband for his understanding, support and warm encouragement which secures my steady and calm minds.

Last but not least, I offer my regards and blessings to all of those who supported me in any respect during the completion of this project.

Thank You Very Much to all.

TABLE OF CONTENTS

	PAGE
DECLARATION	i
ABSTRACT	ii
ACKNOWLEDGEMENT	iii
TABLE OF CONTENTS	iv
LIST OF FIGURES	vii
LIST OF TABLE	ix
CHAPTER 1 : INTRODUCTION	1
1.1 Overview	1
1.2 Background of Problem	2
1.3 Problem Statement	3
1.4 Research Objectives	4
1.5 Research Aim	4
1.6 Research Scope	5
1.7 Research Significance	5
1.8 Summary	6
CHAPTER 2 : LITERATURE REVIEW	7
2.1 Introduction	7
2.2 Digital Forensic	7
2.2.1 Digital Evidence	8
2.2.2 Digital Forensics Tool	9
2.3 Cloud Computing	12
2.3.1 Components of Cloud Computing	14
2.3.2 Cloud Computing Forensics	18
2.4 Logic Model	22
2.4.1 Categories of Logic Model	24
2.4.2 Representation of Logic Model	27
2.5 Data Collection in Cloud Computing	30
2.6 Issues in Digital Forensic Data Collection in Cloud Computing	36

2.7	Summary	36
CHAPTER 3 : RESEARCH METHODOLOGY		37
3.1	Introduction	37
3.2	Research Paradigm	37
3.3	Research Design	39
3.4	Selected Research Design	41
3.4.1	Phase 1 - Preliminary Study	42
3.4.2	Phase 2 - Adopted Logic Model	42
3.4.3	Phase 3 – Interview	43
3.4.3.1	Formulation of Questionnaire	43
3.5	Thematic Analysis	44
3.6	Summary	44
CHAPTER 4 : FINDINGS, ANALYSIS AND RESULTS		46
4.1	Introduction	46
4.2	Adopted Logic Model	46
4.3	Digital Forensic Data Collection Tool In Cloud Computing Environment Interview Evaluation	49
4.4	The Guidelines Adopted Logic Model for Digital Forensics Data Collection Tool in SaaS and IaaS Environment	56
4.4.1	Logic Model of Digital Forensics Data Collection Tool in SaaS Environment	57
4.4.1.1	Phase 1 – Client’s PC Investigation	59
4.4.1.2	Phase 2 – PC Network Probing	63
4.4.1.3	Phase 3 – IDS Investigation	66
4.4.1.4	Phase 4 – Firewall and Router Investigation	68
4.4.1.5	Phase 5 – SaaS Physical Server Investigation	70
4.4.2	Logic Model of Digital Forensics Data Collection Tool In IaaS Environment	72
4.4.2.1	Phase 1 – Suspect’s VM Investigation	73
4.4.2.2	Phase 2 – Suspect’s VM Snapshot Investigation	75
