**THE INFLUENCE FACTORS
OF USING HALAL KIT DETECTION**

NOR RAIDAH BINTI RAI

Dissertation submitted in partial fulfilment of the
requirements for the degree of
Master of Science in Information Technology

Faculty of Computer and Mathematical Science

January 2016

ABSTRACT

Halal is an Arabic term which means permissible or lawful in Islam. It is the Islamic dietary standard, as prescribed in the *Shari'ah* (Islamic Law). In Malaysia, the Department of Islamic Development (JAKIM) applied two principles of *Halal* which are *Halal* (allowable/permissible) and *Thoyyibban* (wholesome) that are taken from Al-Quran, verse 168 Surah Al-Baqarah. Halal industry in Malaysia faced lots of halal issues due to the fake halal logo. This being highlighted in several research that lots of fake halal logo are being used in order to gain consumers trust on their products. In order to overcome the issue one of the laboratory industry company takes the initiative to develop a *Halal* Kit detection as known as porcine detection kit (PDK). PDK is a kit that identifies non-halal ingredients such as pig and alcohol. The aim of this study is to identify the factors that influence intention to use *halal* kit among consumers. The Theory of Planned Behaviour (TPB) has been adopted in this study. There are four hypotheses developed at the early stage of this study. There are four construct have been identified in this study which are trust, attitude, cost and social culture. This study had conducted a survey with 121 respondents among professional worker. The findings of this study conclude that there are three constructs which are trust, cost and social culture that influence intention to use *halal* kit.

ACKNOWLEDGEMENT

Alhamdulillah by the name of Allah, the most Gracious and the most Merciful, as definitely that I have been given the strength and opportunity to complete this thesis, as to fulfilled the requirement of the Master of Science in Information Technology Faculty of Computer and Mathematical Science, Universiti Teknologi MARA (UiTM) Shah Alam.

I would like to express my sincere gratitude to all people who have offered their assistance. First and foremost, I would like to thank my supervisor, Dr Nurulhuda Binti Noordin who has given me guidance and patience, secondly to my beloved family for their encouragement and moral support given for me in the preparation of this thesis.

Here, I would like also to express my greatest gratitude and appreciation to those who were directly and indirectly involved in making this thesis success, without which, it would not been easy for me. Last but not least, to my entire dear friend for their cooperation, moral support and encourage me to until this thesis completed.

Thank you.
