ACKNOWLEDGEMENT

Syukur Alhamdulillah, with the help of Allah I have successfully managed to complete my thesis on ON-LINE TEACHING and LEARNING MANDARI CHINESE. First of all, I would like to express my outmost gratitude to My Lord Allah from all of my heart for guiding me through my 1-year hardest time in completing this thesis.

I would also like to express my warmest appreciation to those who have helped and gave their support through my hard time. To my mum and dad for their understanding on my ambition to hold an honor degree and for all of their guidance and support, I would never forget it for the rest of my life. Also to my friends, who always be there when I need.

Apart from that, I would like to thank to all people who are directly or indirectly involved in making my thesis a reality. My supervisor, Mis Jamaliah Taslim, the best supervisor of all, nice smile with a lot of ideas, who always be there to guide me throughout my work patiently and also to my lecturer, especially Puan Zolidah Kasiran, the best lecturer of all, thank for guidance and support throughout the project and to all of my lecturer I did not mention, thank you very much, A specials thank I dedicate to my external supervisor Mr. Chuah Yun Fah for being such helpful.

Last but not least, I am grateful to say that their guidance and kindness will always remain in my heart.

ABSTRACT

Rapid development in information technology in recent years has made a great impact on teaching approaches and methodologies .The project of On-line Mandarin Chinese Teaching and Learning is designed for Language center of Mara University of Technology ,main campus, Shah Alam, with a particular focus on students who are taking Mandarin subject as their third languages. This project consists of five modules namely Access verification for authorized student and lectures, On-line exercise, Search Facilities, Simplified notes consist of grammar and vocabulary of Mandarin subject and Student interactivities. The main objective in building this website is to help student learn Mandarin subject. This project is being developed using JavaScript, VBScript, NJSTAR 2.0,Active Server Pages and Hypertext Mark-Up Languages and implemented using Web Development Methodologies where all task are transformed into several phases.
