**E-KOLEJ: THE RELATIONSHIP OF USER
SATISFACTION AND USAGE TO INDIVIDUAL
PERFORMANCE**

RAPEAH BINTIMOHD REDZUAN

IT Project submitted in partial fulfillment of the requirements for the
degree of

Master of Science (Information Technology)

Faculty of Computer and Mathematical Sciences

February 2013

ABSTRACT

eKolej has been utilized in Universiti Teknologi Mara (UiTM) since 2006 as the hostel management system. The implementation of the system was seen had improved hostel accommodation process rather than manual system that was used previously. There is no research being conducted to evaluate individual performance which reflected by the satisfaction of users and the usage of the system. Survey data from 112 respondents of eKolej system's user in 20 UiTM's campuses were used. The users include of Hostel Manager, Assistant Hostel Manager and Hostel Supervisor. From data analyses, it has revealed that the level of eKolej system usage had been affected by Assistant Hostel Manager and Hostel Supervisor who using the system more for operational tasks rather than managers who frequently use eKolej for reports view. User satisfaction and individual performance for each level position of staff that using eKolej system was identified as high with average mean more than 3.5. Nevertheless, the main objective of this study is to identify the relationship between user satisfaction and usage to individual performance based on model adapted from Hou (2012). The data were analyzed by using Pearson Correlation and Multiple Regressions to identify the relationship. The results indicate the relationship of user satisfaction and system usage to individual performance is positive. On the other words, higher levels of EUCS or system usage would lead to improve individual performance. However, EUCS was determined has strong relationships and the best predictor of individual performance compared to system usage. Thus, by better understanding of the relationship, the indication for system improvement is determined.

Keywords: User satisfaction, Usage, Individual performance, Hostel accommodation

ACKNOWLEDGEMENT

"Alhamdulillah"

Praise to Allah for giving me the strength and health to finish my IT Project report. This report is part of the requirement for me to complete my study in Master of Science information Technology). However, this report will not be completed without the help and support from several individuals whether they contribute directly or indirectly. I would like to take this opportunity to thank each and every one of them.

Firstly, my deepest gratitude goes to my wonderful supervisor Assoc. Prof. Mardziah Hashim for all her guidance, valuable suggestion, effort and guidelines in assisting me conducts this study. I also like to express my thanks to the programme coordinator Dr Wan Adilah for their advices on my IT project undertakings.

A special thank goes to my beloved husband,
for his continuous support day and night, my parents and my family for understanding and patience during my two and a half years journey in this study.

My thousands thank also I beat to my bestfriends
who are very supportive and contributed ideas indeed helped me to complete this task properly.

Last but not least, I would thank to all people whom generously spent little their valuable time to participate in the questionnaire survey. Without their feedback, this project would not have anything to report. Not forgetting all my course mates and other individuals whom names are not mentioned here for their contributions in whatever forms whether directly or indirectly. Thank you so much and may Allah bless all of you.

TABLE OF CONTENTS

STUDENT'S DECLARATION	i
ABSTRACT	ii
ACKNOWLEDGEMENT	iii
TABLE OF CONTENTS	iv
LIST OF TABLES	vii
LIST OF FIGURES	ix
CHAPTER 1: INTRODUCTION	
1.1 Research Background	1
1.2 Problem Statement	3
1.3 Objective of The Study	7
1.4 Research Question	7
1.5 Significance of The Study	8
1.6 Scope and Limitation	8
1.7 Report Outline	9
CHAPTER 2: LITERATURE REVIEW	
2.1 Introduction	10
2.2 Student Affairs (HEP) Department	10
2.3 Hostel Accommodation Management	12
2.3.1 Staff	12
2.3.2 Hostel Admission Process	13
2.3.3 IS Application in HEP	13
2.4 eKolej System	16
2.5 User	18
2.6 User Satisfaction	18
2.6.1 User Satisfaction Definition	20
2.6.2 Measuring User Satisfaction	21
2.7 System Usage	24
2.7.1 Definition of System Usage	26
2.7.2 System Usage Paradigm	27

2.8	Individual Performance	31
2.8.1	Determinant of Individual Performance	32
2.9	Relevant Studies on Individual Performance	34
2.9.1	Business Intelligent (BI)	34
2.9.2	IT Acceptance	35
2.9.3	Software Application	36
2.9.4	Executive Information System (EIS)	38
2.10	Summary	39

CHAPTE R 3 : RESEARCH METHODOLOGY

3.1	Introduction	40
3.2	Research Methodology Overview	40
3.3	Research Design	41
3.4	Questionnaire Design	43
3.5	Data Sampling	47
3.6	Research Framework	48
3.6.1	End User Computing Satisfaction (EUCS)	49
3.6.2	System Usage	51
3.6.3	Individual Performance	51
3.7	Data Analysis Method	51
3.8	Summary	52

APTER 4 : ANALYSIS AND RESULT

4.1	Introduction	53
4.2	Reliability Analysis	53
4.3	Demographic Profile	54
4.3.1	Gender	56
4.3.2	Age	56
