Programme : Bachelor of Surveying Science And Geomatics (Hons)
AP220

Faculty : Architecture, Planning & Surveying

Thesis Title : Development Of Web Based For Rapid Penang Bus
Tracking System

Signature of Student :

Date : July 2019

ABSTRACT

Providing an efficient public transportation with limited resources available is a challenge in a developing country such as Malaysia. Over time, the number of users of public transport decreases gradually due to the lack of service quality provided. This situation leads to the increasing number of private vehicles and reduction in the usage of public transport. To find out more about this situation, some research had done to find out the issue and problem in Rapid Penang through the questionnaire. Although the system is efficient, it is still inadequate to attract people to use their service. Some improvements are needed in order to make buses as a preferred mode of travel. To provide the information to user, a development of the web based will help user to get the information such as the schedule, bus route, time taken, bus frequency and other easily. It will increase the quality in order to make the user choose the public transportation as a transport to reach their destination. This development of the web based can help tourist and local user identify the journey and can manage their time to travel wisely. The web based are visual method in order to view the information that related to the Rapid Penang services. Thus, efficient system will increase the socio economic development in Pulau Penang.

SUPERVISOR'S DECLARATION	v
ACKNOWLEDGEMENT	vi
TABLE OF CONTENT	vii
LIST OF FIGURES	x
LIST OF TABLES	xi
LIST OF ABBREVIATIONS	xii
CHAPTER ONE INTRODUCTION	1
1.1 Research Background	1
1.2 Problem Statement	3
1.3 Research Aim and Objective	4
1.4 Research Gap	4
1.5 Significant Of Study	6
1.6 Scope and Limitation of Research	6
1.6.1 Scope of Work	6
1.6.2 Limitation and Challenges	7
1.6.3 Study Area	7
1.7 Chapter Outline	8
CHAPTER TWO LITERATURE REVIEW	10
2.1 Introduction	10
2.2 Public Transportation	10
2.2.1 Type of the transportation in Malaysia	11

CHAPTER FOUR	32
RESULT AND ANALYSIS	32
4.1 Introduction	32
4.2 Result of the respondents	32
4.3 Demographic Analysis	32
4.3.1 Gender	32
4.3.2 Range Age	33
4.3.3 Race	33
4.3.4 Occupation Status	34
4.3.5 Income	34
4.4 Bus Characteristic Analysis	35
4.4.1 The nearest bus stop from user location	35
4.4.2 Bus Schedule	36
4.4.3 Waiting time experience	36
4.4.4 Bus Frequency	37
4.4.5 Travel Distance	37
4.4.6 Exchange Bus	38
4.5 4.4 Time taken for each stop in a route	40
4.6 The web based Coding	43
CHAPTER FIVE	52
CONCLUSION	52
5.1 Introduction	52
5.2 Conclusion	52
5.3 Recommendation for Future Work	53
REFERENCE	54
APPENDICES	56
