Acknowledgement

First of all, all praises and thanks to Allah, Lord of al-Mighty, for His Guidance and will, for the revelation of some of His knowledge for me in the successful to write this research. Many thanks to my beloved parents who never quit in giving to me full support, understanding and courage throughout the research.

This research would also not be possible and successful without the help and support from coordinator Puan Jamaliah Taslim and supervisor, Dr Marina Ismail. Many thanks to them for giving instructions, advices, motivation, support and guide the researcher in obtaining a good research. Finally, do not forget to mention and extend thanks to all friends and others who have, in one way or others, given me invaluable help, assistance and advice.

Abstract

Nowadays, children are not interested in the mathematics and they think mathematics is boring. They have difficulties when the question is written in paragraph or sentences. But if the same question is written in arithmetic equation, they normally can solve the question. Playing computer games is one of the most popular activities among children. Therefore, the idea of edutainment is very significant in attracting children to learn mathematics while playing. Game based learning is one of the modern pedagogical approaches beginning to gain attention in education. This project integrated with Multimedia, is to make the learning process more attractive and fun for the children. The purpose of this application is to provide a better way of learning and make it easier for children to learn and understand by developing a prototype of an educational game in learning Mathematical Word Problems. The objective of this project is to develop a prototype for solving mathematical Word Problems for children. The application will cover on the mathematical operation for year two and three syllabus.

Keywords: Mathematics Word Problems, Game Approach for Learning, Learning through Playing

Table of Contents

DECLARATION.....	ii
ACKNOWLEDGEMENT.....	iii
ABSTRACT.....	iv
TABLE OF CONTENTS.....	v
LIST OF TABLES.....	vii
LIST OF FIGURES.....	viii
CHAPTER 1 (Introduction).....	1
1.0 Background.....	1
1.1 Problem Statement.....	3
1.2 Objectives.....	4
1.3 Scope.....	3
1.4 Significance.....	5
CHAPTER 2 (Literature Review).....	6
2.0 Introduction.....	6
2.1 Learning in Mathematics.....	6
2.2 Problem in Solving Arithmetic in Learning Mathematics.....	9
2.3 Overview of Educational Game.....	12
2.3.1 A model of Games and Learning.....	15
2.4 Categories of Games.....	17
2.5 Characteristics of Games.....	23
2.6 2D Tools in Educational Game.....	25
2.7 Children's Learning.....	26
2.8 Related Research on Solving Problem in Learning Mathematics for Children Using Games.....	28
2.8.1 Other Solution.....	31
2.9 Research Methodology.....	33
2.10 Conclusion.....	34

CHAPTER 3(Research Methodology).....	35
3.0 Introduction	35
3.1 Hardware and Software Requirements.....	45
3.1.1 Hardware Requirement	45
3.1.2 Software Requirements.....	46
3.2 Conclusion.....	47
CHAPTER 4(Result and Findings).....	48
4.0 Introduction	48
4.1 Interface Design	48
4.2 Introduction Design	49
4.2.1 Enter Your Name Screen.....	50
4.2.2 Main Menu Screen.....	50
4.2.3 Levels Screen.....	51
4.2.4 Easy Question	52
4.2.5 Answer Screen.....	56
4.2.6 How to Play Screen.....	57
4.2.7 High Score Screen.....	58
4.3 Discussion of Findings.....	59
4.3.1 Functionality Testing	59
4.3.2 Measuring the Functionality.....	60
4.3.3 Usability Testing.....	62
4.3.4 Measuring the Effectiveness.....	63
4.3.5 Measuring the Satisfaction	66
4.4 Conclusion.....	68
