Universiti Teknologi MARA

A Design of Online Cultural Heritage Collection Using Social Tagging Approach for Sultan Azlan Shah Museum

Mohd Asrar Bin Ahmad Razif

Thesis submitted in fulfillment of the requirements for
**Bachelor of Science (Hons) Information System Engineering
Faculty of Information Technology and Quantitative Science**

April 2008

ACKNOWLEDGEMENT

Alhamdulillah, in the name of Allah, the Most Compassionate, the most Merciful and Most Gracious, praise to Allah, the one and only, for giving me patience, strength and ability to complete this report.

Firstly, I would like to thank Dr. Wan Adilah for the guidance and patience in assisting me in completing my research. I would like to thank Pn Suriyati Razali for her guidance at the start of this research. Both of them are really nice and never refuse to help me even when I'm in difficult situations.

I would like to express my greatest gratitude for my family who didn't stop motivating me all the times. My friends helped me a lot during the preparation of this research.

Upon completion of this research, I've learnt so many things regarding the knowledge of Information Technology and I would love to learn more to improve myself in my future undertakings.

ABSTRACT

This research is about designing an online application for museums collection using social tagging approach for Sultan Alam Shah Museum, Selangor. The current museum does offer an online application but the interaction between users and the museum itself is very limited. This research is done to develop interaction between users and the museum through an online application, with the introduction of tagging technology. The tagging technology will assist users search for artifacts in the museum and will provide the museum as a source for historical database and information. The online museum will be a spot for history lovers and most importantly for researchers, students, teachers, lecturers and other museums to discuss and have their thoughts be reviewed by each other.
