

Universiti Teknologi MARA

**The Development of Student Online Activity System
For Pusat Kegiatan Pelajar, UiTM Malaysia**

Nor Madiha Bind Hassan

Thesis submitted in fulfillment of the requirements for
Bachelor of Science (Hons.) Information System Engineering
Faculty of Information Technology and Quantitative Science

May 2008

ACKNOWLEDGEMENT

First and foremost, I would like to express my highest thankfulness to Allah SWT, the Almighty for granting me the will and strength to finish this research on time. It will be difficult for me to complete this research without His blessing and permission.

Not to forget, I would like to thank my thesis supervisor Puan Nalini Dharmarajan for her support and guidance throughout the course of this project as well as providing me such a valuable advice and help to conduct this research. All the crucial guidance and motivation given by other lecturers including Puan Wan Adilah, Puan Juliana, Cik Rashidah, Puan Jamaliah, Cik Rosdiana, Puan Aishah and Encik Saharbudin Nairn Tahir Shah are highly appreciated to give me enough strength in completing this thesis.

Next, I would like to express my heartfelt appreciation to Puan Armai binti Mohammad, the Officer of Pejabat Pengurusan Fasiliti UiTM Malaysia (PPF) and all the PPF staffs for their contribution and cooperation towards this research.

Last but not least, I would like to convey my love and care to my family, my father, Encik Hassan Mat Yasim, my mother Puan Sharipah Muhamad, my brother, my sisters and also to all my friends and colleagues for giving me all the support and help that I need in making this research a reality. Thank you all for inspiring me in such means that could not be written in words.

ABSTRACT

Nowadays, information system has been very important to any organization in order to manage and maintain the data. Information system is not only used for learning and teaching but, also used in management and administration task such as record the information and so on. In *Pttsat Kegiatan Pelajar* (PKP), there is no computerized system that can ease the staff to manage the data efficiently. All the tasks have been done manually. All the data regarding the student activity and society information have been kept in the filing system. It may lead the data being lost, data redundancy and difficult to search for a specific data. The PKP staff also has faced the problem to produce the report. To solve this problem, an online system has been developed that named Student Online Activity system. This system will be used by the PKP staff, student's society committee and the student themselves. By developing this system, it would give benefit to the PKP staff in order to manage, integrate and search the data. Furthermore, the student's society also would get some benefit such as speed up the activity registration through an online registration. They also can maintain their activity schedule by updating the activity that has been registered. For student, they can access the society information that they are interested and register as a member through an online registration. Beside that, the student also can view the activity information. Interview, survey, reading journals and observing the websites are among the methods used in conducting this research. For future^{work}, this system would be more efficient if the scope of the project can be expanding so that the student can access the activity information through the mobile phone.

ABSTRACT

TABLE OF CONTENTS

LIST OF FIGURES

LIST OF TABLES

LIST OF APPENDICES

CHAPTER 1: INTRODUCTION

1.1 Research Background

1.2 Problem Statement

1.2.1. Staff/Admin View

1.2.2. Student's Society/Club Committee View

1.2.3. Student View

1.3 Objectives of the Research

1.4 Scope of Project

1.5 Research Significance

1.6 Summary

CHAPTER 2: LITERATURE REVIEW

2.1 Definition of Manual System and Online System

2.2 Definition of Student Online Activity System

2.3 Sample System

2.3.1	Campus Activities Board (CAB)	11
2.3.2	Student Organization Network (S.O.N)	12
2.4	Software Development Life Cycle Model	16
2.4.1	Requirements	16
2.4.2	Design	17
2.4.3	Implementation	17
2.4.4	Testing	17
2.4.5	Comparison between the Software Life Cycle Models to Find the Best Model for the Development of Student Online Activity System	18
2.4.5.1	Waterfall Model	18
2.4.5.2	V-Shaped Model	19
2.4.5.3	Incremental Model	20
2.4.5.4	Spiral Model	21
2.5	Requirements in developing Student Online Activity system	25
2.5.1	PHP Programming Language	25
2.5.2	Comparison between PHP and Java Language to find the <i>best</i> tool for the Development of Student Online Activity System	27
2.5.2.1	2S2J Programming Community Index for April 2008	29
2.5.2.2	Long term trends	31
2.5.3	MySQL Database	31
2.5.4	Apache Web Server	34
2.6	Summary	35

CHAPTER 3: METHODOLOGY

3.1	Planning Phase	38
3.2	Requirements Gathering Phase	38
3.2.1	Primary Data	35
3.2.2	Secondary Data	39
3.3	Data Analysis Phase	39
