

UNIVERSITY TECHNOLOGY MARA

Design for Knowledge : HCI SIG Website

ILYANI BINTI KAMAROLZAMAN

Thesis submitted in partial of the requirements for
BACHELOR OF SCINCE (Hons) INFORMATION TECHNOLOGY
Faculty of Computer Science and Mathematic

MAY 2009

ABSTRACT

The continuous growth of documents available on the Internet, especially via the World Wide Web, creates the need for new technologies and mechanisms that query the different information stored in heterogeneous repositories. Therefore, to publish the knowledge, the World Wide World has become a very popular tool. A large number of information repositories (Websites) already exist and latest website are being created at a very rapid rate. This research can be used as a guidance to develop a good HCI SIG website based on the criteria that are discussed. The objectives of this research are to identify the design requirements for a knowledge repository website and to design and develop the prototype of repository website for HCI SIG of FSKM. The methodology that had been taken in order to clearly finish the research is defined the problem identification and planning. Followed by data gathering, requirement analysis, and prototype phase. The prototype of HCI SIG website was developed based on the design requirements of knowledge repository website. From the studies that had being done, the researcher found that the requirements need to develop website as knowledge repository is completely understand the content that should be put, the proper or good design regarding to the guidelines and also the best chooses layout for the website. As a conclusion, after completing the research, the understanding of the design for knowledge repository website become clearer and better.

ACKNOWLEDGEMENT

In the name of Allah, the Most Merciful and Most Compassionate

Alhamdulillah and peace be upon Prophet Muhammad S.A.W., this thesis is finally completed with achievable objectives.

Firstly, I would like to thank my supervisor, Dr. Fariza Hanis Abd. Razak and Puan Jamaliah Taslim who have spent their time, patience, dedications, and also for their guidance in completing this report. Also my gratitude to the advisors for IT project (ITS610) and CS220 coordinator, Dr. Fariza Hanis Abd.Razak and Dr. Wan Adilah Wan Adnan.

To my family, mom, dad, and all my siblings, thanks a lot for your support, guidance, sponsorship, and also understanding. Everything you have being done is requisite in completing and finishing this job.

Last but not least, I would like to thanks to all of my friends and all other parties or individual who are not mentioned here.

May Allah bless all of us.

TABLE OF CONTENT

ABSTRACT	i
ACKNOWLEDGEMENT	ii
LIST OF TABLES	vi
LIST OF FIGURES	vii
CHAPTER 1 INTRODUCTION	1
1.0 Introduction	1
1.1 Research Background	2
1.2 Thesis Statement	2
1.3 Research Objectives	2
1.4 Scope	3
1.5 Significances of the research	3
1.6 Summary	3
CHAPTER 2 LITERATURE REVIEW	4
2.0 Introduction	4
2.1 What is a website?	4
2.2 Human Computer Interaction Special Interest Group	5
2.3 Usability and design	5
2.4 Knowledge repository website content	6
2.5 Knowledge repository design	7
2.6 Guidelines and principles	11
2.7 Summary	14

CHAPTER 3 RESEARCH APPROACH AND METHODOLOGY	15
3.0 Introduction	15
3.1 Problem identification and planning	16
3.2 Requirements Gathering	16
3.2.1 Primary data	17
3.2.2 Secondary data	17
3.3 Requirement analysis	18
3.4 Prototype development	18
3.5 User centred design approach	19
3.6 Summary	20
CHAPTER 4 ANALYSIS AND FINDING	21
4.0 Introduction	21
4.1 Requirements analysis	21
4.2 Website analysis	22
4.3 User centred design (interview)	29
4.4 Storyboard	31
4.5 HCI SIG website design	35
4.6 Site Map	39
CHAPTER 5 CONCLUSION AND RECOMMENDATION	40
5.1 Introduction	40
5.2 Summary	40
5.3 Limitations	41
5.3.1 Limited number of studies conducted on design for knowledge.	41
5.3.2 No usability testing	41
5.4 Recommendations	41
5.5 Conclusion	42
